**THE 10 PROVEN STRATEGIES
TO BECOME A MILLIONAIRE**

The Richest Oroko Man

Vincent Bakabe Baduma.

The 10 Proven Strategies applied by Mr. Vincent that made him a Multi-millionaire.

The story of this book is based on a true story. A Man who against all odds came out to be one of the richest in his time. Through little beginnings, he demonstrated through his lifetime that man with no possessions but with an idea can rise up against its foes.

He had a successful Marriage just as he was successful in acquiring Lands and branded Properties. Mr. Vincent who is demonstrated as the richest Oroko Man left a Multi-Million Dollar Properties to his children and great grandchildren who still benefit from it.

In this book we are going to see his little beginnings, and how he rose to become a multi-Millionaire in his time. A life lesson anyone who hungers to be rich can start applying his Principles.

HIS STORY.

BIOGRAPHY.

Born in IWASA NGOLO, Father MR Solomon Baduma and Mother Mrs. Friday Mabola, Mr. Vincent Bakabe Baduma was the only child of his Mother who took long before conceiving. His father died when he was still a child and had to be brought up by his uncle.

Mr. Vincent attended infant class one 1946 and infant class two 1947 at BASEL MISSION SCHOOL, DIKOME. He later moved with his uncle who was a civil

servant teacher at the time to Mamfe. Due to his uncle's transfers Mr. Vincent had to attend several schools.

He attended Standard 1 at RCM CATHOLIC SCHOOL, Okoyong Mamfe. That was in 1948. He later moves on to Kumba where he attended Standard 2-6 at GOVERNMENT SCHOOL KUMBA {1949-1953}. He obtained his FIRST SCHOOL LEAVING CERTIFICATE in 1953.

To further his studies at a high level, Mr. Vincent moved to Nigeria where he obtained his GENERAL CERTIFICATE OF EDUCATION in OUR LADY HIGH SCHOOL ONITSHA, NIGERIA. He passed 3 Papers with good grades, this was in 1962.

Mr. Vincent also sat for the WEST AFRICAN EXAMINATIONS COUNCIL EXAM and passed 6 Subjects and he came out with good grades and a good moral behavior attested by his tutors.

He was married to Mrs. Nyama Cecilia Bakabe and they had 10 children. They had 3 girls and 7 boys. Mr. Vincent made sure his children went to the best schools and obtained the best standard of education.

He was a loving father and a good husband who never raised his voice at his wife in the midst of his children. He always ensured all marital issues should be resolved privately and in the closet.

INTRODUCTION:

Many people desire to be rich but they forget to know that there are principles for riches. Those who apply these principles obtain wealth and are able to accumulate riches. Savings are very important, and focusing on acquiring assets instead of liabilities.

You need to have a success mindset. A mindset that can resist any form of failures and be able to win all your battles. Success starts from the mind and affects every area of your life. Are you success minded or failure minded? Change your thoughts and change your life.

The reason most people accomplished little is due to the fact that they lack persistence. Persistence is a virtue each and every one must possess for the

accumulation of riches. You must not easily give up when you face opposition on your way but be persistent in your work. Persistence is a virtue for all rich and wealthy people.

Information is your life. What you know can either make you rich or poor. Most people are poor because they lack financial intelligence and have limited information and knowledge about money and how the monetary system operates. Strive to have more information about your work and increase your financial intelligence.

You have to understand man can have anything he ever dreamt of if he applies the principle of imagination. Channel your thoughts and thinking to the right things and the right directions. What you see in your mind's eyes will surely come to pass whether good or bad.

Investing in rental properties and real estates will put money in your pockets for life. This is money gotten from your tenants every month. Rental properties are very good in acquiring a lifetime and recurrent commissions.

Action is the birth rock on which success stands. There is no success without action, in other words you won't accomplish anything if you don't take action towards your dreams and goals. Be an action taker in everything you want to accomplish in life.

The law of money stipulates "he that wants more must release what he has" you must allow money in circulation. Avoid hoarding money. Also you must be able to manage and control your money well.

Words are powerful and have a great impact in our lives. They can influence our lives positively or negatively. You must learn how to use your words correctly. Let your words be positive and let it be a source of blessing to others and not curses.

Everybody wants to be happy in life. No one wants a sad life. But most times we think happiness has to do with what we possess or the amount of money in our Bank accounts. Happiness is a choice. You can choose to be happy 24hrs a day. Let your happiness not depend on what happens to you or around you.

TABLE OF CONTENT.

Chapter 1. HOW TO BECOME A MILLIONAIRE. Desire... Save 10% of your income... Reduce social media Presence... Focus on assets and not Liabilities...

Avoid Extravagant living... Time wastage... Wake up early... Write down your goals... Priorities of your work... Avoid Excuses.

Chapter 10. HAPPINESS. Smiles are contagious, laughing the secret of joy, developing inner happiness, how to be happy every day, Mr. Vincent teaches on happiness and the reason why you should always be happy.

1

HOW TO BECOME A MILLIONAIRE.

STEPS TO BECOME A SELF MADE
MILLIONAIRE.

DESIRE.

Desire is at the top of the list if you want to become a millionaire. A strong desire will bring strong results and a weak desire will bring a weak result.

You need to have a strong desire to become a millionaire. According to Mr. Vincent, having a strong desire is as important as watching an interesting football game for many people.

Never underestimate the power of desiring something. Desiring to become one has made so many unschooled People to become millionaires while the schooled are wondering the reason why they are poor despite their education.

Money will come to you in abundance if you have a strong desire to acquire it.

Mr. VINCENT TOP 4 WAYS TO DEVELOP A STRONG DESIRE.

There are 4 ways Mr. Vincent believes a man can develop a strong desire. You can apply them and strengthen your desired muscles.

FIRST: Read books on Millionaires. You have to fill your library with books from self-made millionaires. Reading such books helps you tap into their vast mental strength. With the shortest time their own strategies will guide you during the day and open your doors of immense possibilities.

SECOND: Go through Success Magazines. Apart from reading books on millionaires, you have to read their stories also. And most of their stories are found in Magazines.

THIRD: Watch videos of self-made Millionaires. Videos are a great way to speak to your subconscious mind directly. Your subconscious mind absorbs all information from the conscious mind. So filling your minds with those things you want is a great way to make your mind and desire stronger.

FOURTH: Work your Passion. You cannot develop a strong desire if what you do it's not Passionate. You have to do what you love. This is the best driving force to Propel your mind towards a millionaire attitude. Work on your passion and do what you love. This alone will give you a strong desire, says Mr. Vincent.

SAVE 10% OF YOUR INCOME.

The second known way to become a millionaire is to save a portion of your income every month. The richest man in Babylon, one of the recommended books, expands on this issue on savings.

You cannot be rich if all your earnings are being consumed. You must discipline yourself to always save a percentage of your earnings. You can start with 10% and then increase with time. The beginning will always be difficult but you will discover sooner that you are coping with that.

Save your 10% in the Bank. You have the possibility of earning interest upon your savings. So savings are a Powerful tool if you want to become a millionaire.

Reasons why you should save a Percentage of your Income.

FIRST: Peace of Mind: Savings help to give one a Peace of Mind. Knowing you have money somewhere is the best thing that can happen to you. This feeling alone attracts more abundance to you. Fear and insecurity about money repels money from most people. When you begin to save a percentage of your money, this fear is eradicated and money loves minds which embrace no fear about having it.

SECOND: Discipline: Saving money makes you develop discipline. Many people are not disciplined in life. That is the reason most of them live a frugal life and remain poor. But when you start saving on discipline, this empowers your mind. Any other activities you will be carrying out apart from savings will work out because you are disciplined. So savings is a great way to develop a disciplinary life.

THIRDLY: Financial Intelligence(IQ). Many people are poor and stranded because they lack financial intelligence. Financial intelligence is very essential for the building of wealth. This is where savings come into play. Savings increases your financial intelligence and draws you closer to becoming a millionaire. So saving a percentage of your income every month will increase your financial intelligence.

FOURTH: Sense of security: Saving money gives you a certain type of security. You think positively all the time. You have a relaxed mind and you are happy. This energy alone is enough to pull money into your life. Saving 10% of your income is very important if you want to become a millionaire.

REDUCE SOCIAL MEDIA PRESENCE:

Social media is a great way to meet friends and share ideas and recall some good old memories. But it can become toxic if care is not taken. Too much presence on social media chatting with friends can lead to serious financial instability since you have no time for work.

You must learn to spend less time chatting with friends who care not about how you pay your bills. Your time should be focused on building wealth and developing a creative mind.

Social media is not bad, but what I am trying to point out is spending too much time on it and giving less time on reading a book on self-motivation or self-growth. One can actually turn social media into a Money making Platform apart from chatting and sharing pictures with friends that have no real impact in your life. Let me share with you the 5 ways to use social media to make money.

Here are some reasons how to use social media to make Money.

1). Open a Facebook Page: A Facebook Page allows you to better control your business, Product and services. A Facebook Page is a great way to make money online. It enables you to have an image and personalize your Brand. You can grow your page by sharing with friends and in other groups. Once you have a huge following, you can start offering your services. It could be selling goods or products online or offering a service like teaching. You can apply that with any social media platform and start building wealth.

2). Open a Facebook group. A Facebook group is another great way to make money online. You can open a group and invite others to join your group.

You can promote your services in your group and encourage friends to share your Products once you have Posted them. So unlike Facebook Page, Facebook groups are also a great way to make money online. There are People who make not less than \$2000 Monthly just selling online.

3}. Advertise your Product and services. Spend your time on social media by advertising your product. We cannot talk about promoting a good you don't have. You have to first have one to advertise. You can start drop shipping. Meaning advertising the Product of an existing company but adding your own Percentage on the original price. You can also do affiliate Marketing.

4}. Paid Advert. If you find it difficult to meet a large sum of people, you can do Paid advert. With paid advert Facebook helps to promote your product or services to a large number of audience. This gives you the Possibility of reaching thousands of people at once. So paid advert is another great way to promote and sell your goods online.

5}. Quality YouTube Videos. YouTube is another great way to make money online. There are people who make millions just on YouTube videos. You too can start Promoting your Product or service on YouTube. Let your videos reflect the type of business you do.

FOCUS ON ASSETS AND NOT LIABILITIES:

For one to become a millionaire he has to focus on acquiring assets and not liabilities. This is where many people get it wrong. Most People acquire liabilities

and think they are assets. In this section we will be seeing the difference between assets and liabilities.

Assets are things bringing money in as compared to liabilities which are those things that take money out from one's Pockets. So Assets bring money in your Pocket while liabilities take money out from your Pocket.

Assets: Work on acquiring assets. Acquiring Assets will make you richer. Examples of Assets include Rental Properties, Proprietor of a School, Business, Investments, Real estates. If you want to be rich and become a millionaire, you should work on having this things in your life. They bring money in your pockets.

Liabilities: Liabilities will make you Poorer if you acquire them. Examples of liabilities include Cars, houses, expensive dresses, frugal living. Don't confuse liabilities and needs. Needs are very important like food and shelter.

Mr. Vincent believed so much in assets that he spent all his life focusing on having them. At the end of his life he had assets worth Millions and Millions of dollars. He had landed Properties, rented Properties and a Business generating income Monthly.

The rich acquire assets while the poor acquire liabilities. Make up your mind to start a business that will generate income for you. Work your business and focus less on liabilities.

AVOID EXTRAVAGANT LIVING:

If you want to become a millionaire, you have to avoid extravagant living at all costs. Extravagant living is spending on things you don't need. Wasting money just to prove a point to friends and others around you. We have said earlier that, in life, get just your needs. Buy a car if it's really necessary for work and not to prove a point to A and B who don't even care about your wellbeing.

I have met People in life who live in big houses and drive expensive cars but can't pay their rent. Some of them can't even eat. Most people see them in cars and are envious but they are not any better. I have equally seen People who live in moderate houses but eat well, and send their children to government schools. If you aspire to become a millionaire, avoid extravagant living and start counting your expenses.

MR VINCENT 4 REASONS WHY YOU SHOULD AVOID EXTRAVAGANT LIVING.

The future is more important: The future is more important than the present. It is preferable you pay the price today and enjoy tomorrow. Many enjoy today to suffer later. Always look at the future before anything else. Forget about the Pleasures of today and don't mind what others think or say about you.

Extravagant living leads to Poverty: One major reason you should avoid extravagant living according to Mr. Vincent is that it leads to Poverty. Spending all that you earn is very dangerous. You cannot become a Millionaire if all your earnings are spent on extravagance. Therefore, to avoid a Poverty stringing life, you have to avoid being extravagant.

Opportunity may Pass you by: The reason you should avoid extravagance is that opportunities could Pass you by. I have heard people say things like, if I had money I would have accepted that scholarship to travel abroad, I would have started that business that was presented to me yesterday. Opportunities can Pass you by. You will find yourself not able to do what you would have done.

Short-lived Happiness: The happiness you have in an extravagant life is always short lived. Partying with friends, drinking, getting drunk, keeping late nights, buying things you don't need and that served you no Purpose. All these things are short lived and give you a short lived happiness. So avoid extravagant life and enjoy life because its happiness is short-lived.

TIME WASTAGE

If you want to become a millionaire, avoid wasting your time and energy unnecessarily on things that have no real financial impact on your life and future. Time that is wasted cannot be gotten back no matter how hard you try to cover up. Once the time is gone, it's gone for good and there is nothing you can do to have it back.

Most people waste time watching television and browsing the internet. Rich People don't watch tv more than 2 hours a day. You have to know that time is the only factor once gone cannot be recovered. Instead of wasting it, look for something valuable to do. Something Productive during the day.

Productive things you can do during the day.

Firstly, you can read a book. According to Mr. Vincent Bakabe, reading is a great way to illuminate your mind and enhance your thinking. Reading success oriented books increases your Productivity. So look for a book on success and start reading right away. Make sure your house library is filled with success books and books on how to prosper.

Secondly, you can go to the gym and do your workout. These little exercises help increase your brain activities. With a powerful brain you will be able to think well. So do some exercises during the day.

Thirdly, meditate during the day. Which type of life do you want to have? How do you want your future to be? Learn to have some quiet time during the day and meditate on what you want to accomplish in your life. Your mind will work out ideas for you and bring to reality all your thoughts.

4 Unproductive things to be avoided during the day if you want to become a millionaire.

Firstly, Unnecessary TV Programs. You have to avoid unnecessary tv programs that have no financial benefits for your life. Mr. Vincent never watched Tv on a regular basis but he had one for his children. He was always busy at work and focusing on building wealth. Avoid tv if you want to become a millionaire.

Secondly, Unnecessary Arguments. Avoid unnecessary arguments with friends and others. Arguments on who is the best Player in the world? The best politician is this or that person. Arguments should be avoided with the last energy if you want to become a millionaire. Use that energy to plan for your future.

Thirdly, hangout all the time with friends. If you spend all your time hanging out with friends, be ready for the rocks. No rich man does that. Millionaires are closed doors people and not hangouts. They spent most of their time indoors and thinking about new ways to make money. Avoid this Poverty trap at all cost.

Fourthly, Idleness. Idleness is one of the free roads to Poverty. Avoid being idle when there are lots of opportunities around you. I have heard many people complain of not having anything to do. You can sell dresses and other things in the market. You can start your own online business. Don't sit down during the day doing nothing, find something and make your life better.

WAKE UP EARLY

Waking up early is one of the key reasons why Mr. Vincent Bakabe Baduma became the richest Oroko Man. A man who believed in values. A man who believed you have to be early at work if you want success. All these attributes worked for him and made him the richest Oroko Man and one of the richest Men in the world with huge properties, benefiting generations yet unborn.

Waking up early simply means avoiding too much sleep. Rest is good especially if you work all day long. But too much sleep is a killing factor leading to one economic failures.

Consequences for a Man who sleeps too much and always wakes up late.

1} **Unproductiveness.** Unproductiveness is one of the consequences of too much sleep. All your activities will be grounded and the work you do cannot grow. Lack of growth and unproductivity simply means lack of money and Poverty.

2} **Lack of discipline.** Too much sleep and waking up late will lead to indiscipline at your work. And this indiscipline may cause you to lose your Job, since all you offer is unfruitfulness and indiscipline. So too much sleep has to be avoided at all costs. Train yourself to always wake up early no matter what. Discipline your sleep pattern even if you have to use an alarm clock.

3} **Lack of self-control.** Too much sleep means lack of self-control. Too much sleep and keeping late at your activities means you are not fit to become a millionaire. To be rich and to become a millionaire you have to prove to yourself that you merit wealth. This is shown by your willingness to control yourself with sleep.

4} **Leads to Poverty.** Little folding of the hand to sleep leads to poverty, says the Bible. The Bible encourages work. Another scripture says **“A MAN THAT SHOULD NOT WORK SHOULD NOT EAT”**. A man that loves sleep shall be Poor. This bible verse was quoted by the richest man in Jerusalem at the time. His name was **KING SOLOMON**. So too much sleep will lead to poverty, to be avoided at all cost.

4 Good things that happen to a Man that wakes up early.

1} **Energy.** The man who wakes up early is gifted with another type of Power, known as Vital energy. With this type of energy during the day, you accomplish all that you lay your hands on. This energy brings good things into your life. Positive people with this type of energy come your way and they help to add value into your life.

2} **Confidence.** Note that you cannot accomplish much in life without confidence. Confidence is very important for success. When you work up early and keep time in work you gain confidence in yourself and this confidence alone makes one accomplish much.

3} Increase Productivity. Sales in business goes up, Promotion in work is guaranteed. You have an increase in Productivity. Others can't understand why your life is so. You now master what others took years to master. You now accomplish the impossible at work and have become unstoppable. Now you are not afraid to take risks because of an increase in Productivity. Your business now blossoms at all levels. This is what happens to a man with an increased Productivity.

4} Developed your Will-Power. The man who woke up early develops willpower. A man with willpower is always mistaken for a Proud man. You are courageous to take steps on what many are scared of. Willpower is a power that differentiates a millionaire from a struggling or middle-class person.

WRITE DOWN YOUR GOALS.

Goals are very important in anything you want to accomplish. Millionaires have clear written goals. You cannot succeed in life without goals. To become a millionaire, you must develop the habit of writing down your goals in life. Someone who has a written goal will accomplish more in life than the person with no written goals. Always take time to write your goals on a piece of Paper or a book.

When you write down your goals you crystalize it. You give it a tangible form and a written goal has power. Don't just sit down and say I want to accomplish this and that. Write down your goals on a Piece of paper.

Create a Plan.

After writing down your goals on a Piece of paper, create a Plan on how you will accomplish it. You need a Plan. When someone is building a house he has a Plan on how he wants his house to be. It's only with a Plan that you accomplish your written goal.

Take Action.

Take action on your plan. Every good plan without action is useless. Once you have set up your Plan, take action immediately on that plan. There is no success without action. Work your plan until you get the results you want. Take action immediately and start building something great.

Work Daily.

After you have taken action on your Plan, make sure you work daily to see your plan to success. You have to do daily work for the accomplishment of your Plan. A day should not go by without you working your Plan. Do something every day. That's how you will accomplish your goals and bring all your plans and objectives to realization.

Know When to Stop.

You have to know when to stop. When you have accomplished that goal, stop and work another goal. If you realize that goal has come to pass, you have to stop and create another goal. This is only Possible when you have a written goal and a Plan for its realization.

If Your Plan Fails.

If your Plan fails, do not give up. Many people give up when what they aimed at didn't go well. If your plan fails, create another plan and keep working it. You

should always have a plan B when aiming at a target. Replace the goal that fails with a livelier goal.

Mr. Vincent 10 Reasons why you should have Written Goals.

1} Ability to Stay Focused.

When you have written goals you create an ability to stay focused on your objectives. Many are Poor and accomplish nothing in life because they lack the ability to focus. This also is due to the fact that they have no written goals. So to be focused and become a millionaire, you need to have written goals.

2} Efficiency.

Have you ever heard words like this man or that women are very efficient in their work? Efficiency comes as a result of written goals. Without written goals you cannot be efficient in your work and accomplishments. In order to be efficient, write down your goals on a Piece of paper.

3} Little or No Mistakes.

When you have written goals you are liable to make little or no mistakes. But those without a written goal made a lot of mistakes which at times cost them losses in finances or their jobs. So to be on a safe side, you need to have a written goal and know exactly what you want out of life.

4} Mapping Your Future.

Clear written goals help you map your future. Some don't know their lives are like maps. What you make of it, it is what you will become. If you don't take

time to map that life, you will end up poor and stranded. Written goals enable one to see the future like a map and follow it. This takes such individuals straight to the place of gold and accomplishments.

5} Identify your Weakness and Limitations.

A written goal enables you to identify your weaknesses and limitations. Knowing your weakness and limitations can make you stronger or help you create another plan that matches your strength. If you want to know your strengths and limitations, always have a written goal for every project you want to undertake.

6} Put You Under Pressure.

Written goals have the tendency to put you under pressure. You feel pressured when you have not yet done what you were supposed to do during the day and the day is coming to an end. This type of pressure is good because it helps you to be productive, and see to it that what you have planned during the day must come to pass.

7} Amplifying your Thoughts.

Considering the fact that our thoughts control our lives, should be a key factor why you should have written goals. Written goals amplify your thoughts towards success. All you think during the day is how to accomplish your dreams and goals. Along the day you will get ideas for the realization of that project and goal.

8} Motivating Factor.

Without motivation you cannot accomplish anything worthwhile in life. Motivation is the key factor on reasons why most people succeed or achieve

success in all they do. Without motivation you are like a dead engine of a car. So written goals activate this engine and make you highly productive in your work. Note that with no motivation in life there can be no success.

9} Peace of Mind.

Written goals give you a sense of accomplishment. This feeling of accomplishment gives you peace of mind. It has been proven that those with Peace of mind know exactly what they want from life and have a written plan on how to accomplish them.

10} Increased Power.

Have you ever met people who have this strange kind of respect? Everybody just bow at their feet and you hear the “Yes Sir” word. This is the kind of power we are talking about. Power is not only accredited to Presidents and ministers. There are people without office locations but are having this power. Some Pastors are respected while others are not, same goes for Politicians, business men and so forth. Clear written precise goals unleash this kind of Power.

PRIORITIZE YOUR WORK.

Your work has to be your priority. Many People get distracted over many things. They try to do many things at once. When you try to do many things at once, you disperse your energy and this dispersion will make you have limited results in your work.

When starting your day, you need to have a Priority. Meaning what is the first thing I have to do and what is the last thing to do. Focus on the first thing and make sure you accomplish it before you can move to the next work.

Let's say you want customers for your business, and you have to visit a friend for lunch. You can start with recruiting customers first and make sure that you have done it before visiting a friend. Your work should be the first thing you do before any other thing during the day.

If you want to become a millionaire, you have to cultivate the habit of Prioritizing your work. This is the tradeMark of any successful person you meet or see out there. They make their work a Priority in their life's.

Millionaires understand if they don't put their work first they may become unproductive and start to lose money. So they by all means make sure no one gets them distracted. They make sure no other activities get them distraction. You have to follow their footsteps to become a millionaire. Prioritize your work.

AVOID EXCUSES.

Excuses have kept many people poor and stranded. If you want to become a millionaire, you have to avoid excuses. Many people make excuses when they meet opportunities that could change their lives.

People have different reasons why they think they are not fit to acquire or have certain qualifications or carry out certain Projects or the reason why they are poor.

Mr. Vincent 5 types of Excuses that keep People Poor and their solutions.

Firstly, Qualifications. Many people think they are not qualified or are not fit for a certain post or responsibility. They think they are not supposed to be there. So they turn down an offer that could change their lives.

SOLUTION: The solution is High self-esteem. You have to boost your self-esteem. To boost your self-esteem, look for a Mentor. Someone who accomplished twice as much. You will have noticed most people who succeed are not even better than you. You can learn this from a mentor. Read books on boosting self-esteem or how to boost your self-esteem. Low self-esteem is the reason many think they are not qualified or fit for a Particular Project or work.

Secondly, Lack of Education. Many People who have not gone to school think the reason they are not rich is because they did not have a certificate. They look down on themselves because of a piece of paper. But education is not sitting down in a classroom. Education is knowing all that you have to know to have whatsoever you want in life. There are so many educated People who are Poor people. On the other hand, we have people who have never attended school but are multi – millionaires.

Anybody reading this book and applying the Principles can become a millionaire, whether you have gone to school or not.

SOLUTION: Start learning whatsoever you have to know to make money. Start a business and read books on Prosperity. Invest more on Personal development. Don't allow others to influence you with negative tendencies. Work towards achieving and you will achieve.

Thirdly, Health Issues. Here is another issue: people think they can't achieve anything in life. Whether you are HIV Positive, Diabetic, impair in legs or hands,

you can still achieve great things in your life. I have seen blind people become millionaires, deaf, lame and people with health conditions become millionaires. It should not be a reason to stop you. Decide to win and win big.

SOLUTION: If your health is bad go to the doctor but if the doctor does a test several times but can't find anything then relax and take a drink, all is okay. At times trying to solve a little issue we tend to complicate it into severe other conditions. Treat yourself but if nothing is getting better stop and focus on your goals. With time the condition will get better by itself.

It has been proven that most illnesses are mental and fear. Get rid of fear and call it bluff and move with your goals and dreams in life.

Fourth, No Money. The lack of money is another reason people give for not having some good things in life. But lack of money should never be a motivating factor on why you think you are poor. Money is just a facade. You can actually accomplish great things in life without money. You can also start that business without having any dollar in your account.

SOLUTION: Sit down with a piece of paper and ask yourself what can I do to accomplish this or that. Not just how to have money. But what can I do to have that project, to have that business. Jot down all the ideas that come into your mind on a piece of Paper. Start putting these ideas immediately into action.

Fifth, What Others will say or think. The greatest mistake you can make in life is to be worried about what others think about you. Most people with little achievements will give you some of these reasons. They are always worried about what family; friends will say if they embark on a project that could change their lives. The truth is, most people don't care about you. They only care about their

own wellbeing and that of their family members. Most people when they come into your life are to get something from you. So why are you worried about what they might think of your own life and its projects?

SOLUTION: Close your ears from any distractions. Close your mind from family members and friends. What they think is not as important as what you think. Never listen to the advice of failures. Stay alert on your environment and chase away all negative energies.

**A MILLIONAIRE MIND LEADS TO A
MILLIONAIRE LIFE**

2

SUCCESS MINDSET

**A MAN BECOMES WHAT HIS MIND
IS MADE UP OF.**

Having a Success Mindset is very important if you want to be rich. Many people are Poor because of their mindset. If you think all rich People are bad people because of their money, it simply means you have a poor mindset. If you think all rich people are thieves, you are having a poor mindset. If you think money is occult, it simply means you have a poor mindset.

Change your Mindset, change your life. This is a very important chapter because we will be talking on ways to impact your mind, so it can carry the virtues of positivity.

FAITH.

The principles of faith apply to everybody living under the sun. Just like the law of gravity, you need faith if you want to accomplish greater things in your life. You need faith if you want to be rich.

Mr. Vincent was a Man of faith. A man who failed several times but still came out to become one of the richest Men to have ever walked the face of this earth. A Man who believed the word impossible does not exist.

7 Key Ways to Build a Strong Faith.

There are seven key ways to build a strong faith. These Principles anybody can apply it and have results. Note that without strong faith it is impossible to build wealth.

1] Prayer.

Prayer is the number one key point for all those who desire riches. Prayer is the engine of faith. It is impossible to build faith without prayer. Wealthiest people around the world believe in prayers. Mr. Vincent Bakabe was a man of Prayer. He always says I quote "All in GODS HANDS". He was always thankful to God for everything. Develop a strong Prayer Life, because this is the birth rock of faith.

2) Méditation.

Meditating on a regular basis is another way to build your faith. Most rich people use meditation to build their inner strength. Look for a quiet place and close your eyes and just be calm for about 5 Minutes. You can do this daily every morning when you wake up from bed and late in the evening before retiring to bed. Meditation will give you a strong mind and build a solid faith for you.

3] Passion.

If you do what you are not passionate about you will have small faith. Small faith will lead to smaller results. But if you do what you love and are passionate about, you will develop the inner strength to move on despite challenges. It is this force to overcome challenges that builds a strong faith for you. Not long enough you will be convinced nothing is impossible.

4} Belief.

Believing is one of the driving forces for accomplishments. Rich people became rich because of their belief systems. We spoke about prayer earlier and the importance of prayer. The reason prayer is important are, prayer helps you have a strong belief system. Belief you have received and you will receive. Belief it is possible and you shall obtain what you want and make all your dreams come true. So to build a strong faith you have to believe.

5) Offer a helping Hand.

To develop the strongest faith ever you need to offer a helping hand to others. Seeing yourself solving people's problems will get your spirit boosted and this sends a signal to your mind that you are eligible to have what you crave for in life. This activity alone of solving the problems of others will boost your faith and make it stronger. Learn to offer a helping hand for those in need. You are doing yourself an immense favor for a major turnaround in your life.

6} Offer Forgiveness.

You have to learn from today that most people are poor and stranded because they don't forgive others. Unforgiven, limits your faith and makes you

unproductive. If you want a strong faith, forgive others who have wronged you in the past. The Bible clearly states a Man who holds grudges against his brother, his prayers will not be answered. Forgive others and always say “I'm sorry” when you are wrong.

7} **The Ants Strategy.**

The ant strategy is one of the most powerful strategies to acquire a great and strong faith. You can learn great lessons from the ants and put to work those strategies which are used by the ants. These strategies can help you build a strong faith.

Four applicable strategies you can learn from ants.

A} **Timing.** Ants gather their food during the dry season. This ensures their security on Provisions when the rainy season comes. This strategy is called timing. You have to work on timing. If you are working on a Project, gather the necessary equipment before starting out. Always prepare for the days ahead.

B} **Unity.** In order to build a strong faith, you have to work with a team with one purpose and in unity. Ants are very united in purpose. This explains why they accomplish much with little time and less effort. Unity with your work team builds your faith.

C} **Action.** Ants are action oriented. They do not sit and wish, but they go out and work. Faith without works is dead. For you to develop a strong faith you have to take action on what you want to accomplish. Action builds your faith.

4} **Courageous.** Ants are very courageous though small. Ants don't need your permission to visit your food and take its share. You have to be courageous like

ants. Timidity has made most classroom geniuses to be poor in life while courageous Grade B and C students have become Multi-millionaires. To build a strong faith one needs to be courageous like Ants.

OPEN MINDEDNESS.

Open mindedness is very essential for the accumulation of wealth. A closed mind leads to poverty while an open mind allows the rivers of prosperity to flow into it. Are you open minded or closed minded? Answering this question is very important if you want to become a millionaire.

8 differences between an Open mind and a closed mind.

1} An open minded person sees opportunities while a closed minded person does not see opportunities. Opportunities are all around us. Selling dresses or starting a business is an opportunity to become a self-made Entrepreneur. But the closed minded person believes everybody sells dresses already and that it's not profitable. He believes getting into such a business will not help him. He prefers to look for a Job and work for someone else.

2] An open minded person is not afraid of challenges. He understands challenges make one stronger. On the other hand, a closed minded person is easily defeated by small challenges. He easily gives up when a challenge presents itself. You should bear in mind that challenges come but only the open minded person withstand the challenge and change the narratives.

3} An open minded person sits on the shoulders of giants. He understands that to succeed in life a mentor can shorten one's journey. The closed minded person

believes he needs no one. He thinks he is self-sufficient. This explains why closed minded people are poor and are not doing well financially. Get yourself a good coach, learn from him and your mind will be enlightened and mistakes will be avoided.

4} The open minded person learns from others. He gathers information from intelligent people while the closed minded person believes the ideas of others ahead of him don't count. You have to learn from those ahead of you. You can listen to their audios, watch their videos and attend their seminars. By doing so you unlock your mental powers. You mingle your thoughts with theirs. In no distant time you will find those thoughts driving you into success. You want to become a millionaire? Then learn from millionaires.

5} Open minded people are not easily provoked by the words of people. They are focused on accomplishing their dreams in life. Closed minded people are always thinking about what others are saying about them and they easily pick up offense against others. To stay on a safe side, avoid being provoked by the less intelligent people. Keep your mind safe.

6} Open minded people know how to turn obstacles into solutions. They understand obstacles are opportunities in disguise. But a closed minded person gives up on a slightest obstacle. They believe it's a sign not to continue. So they give up on their dreams. If you aspire to become a millionaire, you have to understand obstacles are opportunities in disguise. Don't give up on a slightest obstacle on your way. Instead keep pushing until you see the limelight.

7} Closed minded people avoid failure. They refuse to carry out projects because they are afraid if they fail others will mock them. So they avoid going for their

dreams. Open minded people know that failure is the brother of success. To meet success, you have to pass through multiple failures. They understand that, it is when they fail, that they progress one step at a time towards their goals and objectives. You don't have to be afraid of failures.

8} Open minded people love while closed minded people don't love. Open minded people express love to their environments through their actions, thoughts and energy. They are generous in smiles with their neighbors and good in giving their substance to others. Closed minded people believe everybody is an opportunist who comes just to take the little they have. Their minds are closed and no love flows in, and in return they get closed doors.

Understanding this will help you know how the principles of life function. Work according to the principles of an open minded person and you will start seeing changes in your life and in your finances.

Mr. Vincent works with these principles. These are the principles that made him a multi-millionaire and the richest Oroko Man. These principles guided him throughout his life and made him become one of the richest men to ever walk the face of the earth.

THE FEAR OF FAILURE.

To be successful in life you must not be afraid of failures. Failure makes one stronger. Many people are afraid to fail. They don't persevere in making their dreams in life come true, because of a little failure or series of failures. You have to understand there is no success without failures.

Every great and successful man you see out there has experienced failure. Mr. Vincent failed many times. He had the tendency of saying “If at first you don’t succeed try, try, try again”.

You must be bold like a lion and follow your dreams voraciously. Don’t think of what others will say if you fail. The man who fails learns, and this proves he is busy doing something. The man who fails is better than a man without action.

MR VINCENT 7 REASONS WHY MOST PEOPLE FAILED IN LIFE.

1} No specific plan.

Most people fail in life because they have no specific plan on their goals. They want to achieve big and have set out with a goal but they don’t have a plan on how to bring that goal to pass. For you to succeed big and become a millionaire you need to have a plan on how to carry out your projects. Put your plan in writing and don’t just sit and talk about it. Write that plan on a piece of paper and follow through with it.

2} Lack of vision.

Lack of vision is another reason why most people fail in life. They wake up in the morning but don’t really know their destination during the day. You meet them on the highway and ask them “what is your vision in life?” they answer you “I don’t know, anything that comes I take”. Such an individual is already on the failing side. If you don’t know what you really want out of life, then you are sure to meet with failure. Have a vision for your life. And every morning work on it to make that a reality.

3} Weak Mind.

Weak mind is another reason why most people fail in life. They are easily offended when their boss or colleagues offend them. They are ready to quit their jobs on the slightest offense from their peers. This is so because they have weak minds. You must learn to take the arrows others throw at you. These arrows make you develop a strong mind.

4} Average Mind.

While weak minds are easily provoked, average minds on the other hand are offended by their pay. They are ready to quit their job because according to them the pay they receive is not what they had expected. They complain all the time about how others are getting promoted, not them. Average minded people are sure to meet with failures.

5} Lack of Basic Education.

There is no way you can succeed in life without basic education. Learning how to read and write is very important. If you don't have the time to attend a daily class, you can attend an evening class. Master your ABC and 123. But we say earlier certificates are useless in the accumulation of riches. What are we saying here is learn how to read and write the ABC and 123. If you don't learn the basics how will you even know how to calculate your money.

6} Believing in Luck.

This is where most young people got it wrong. They think success is a matter of luck. They think successful people are just lucky to have their riches. There is no luck in success. There is no luck in the accumulation of wealth. Hard work and

persistence brings success. This explains why most lottery winners always return back to poverty because their minds are poor. There is no luck in the accumulation of wealth and riches.

7} **Fear of mistakes.**

Most people fail in life because they are afraid of making mistakes. Mistakes are only made by men of action. Men who are always on the move will make mistakes. Also we learn by making mistakes. Without mistakes there will be no growth. Carry on with your projects and don't be afraid of making mistakes.

THE 4 TOP WAYS ON MINIMIZING YOUR FAILURES.

Failures in life cannot be avoided especially if you are carrying on a very big and important project. Failure is not to destroy us but to make us stronger. Failure is a way for God to test our patience and see if we are fit for the task ahead. Below are the 4 top ways to minimize your failures.

A) **Learn from your superiors.** To minimize your failures, you have to learn from those ahead of you. Knowing why they failed in some projects will help you avoid the same mistakes they did that made them fail. Take time to learn from those you admire and learn all that you need to know about them.

B) **Having enough Rest.** Having enough sleep helps you avoid mistakes in work and in your projects. Most people fail because they don't rest enough. Your brain is like a computer, too much work and lack of adequate rest could affect your brain power to operate during the day. Have enough rest. Go to bed early and wake up early.

C) **Don't rush into decisions.**

When you see a friend running a business, don't just jump in and start the same business just because he is making profit. There could be many aspects on why he is successful. For instance, his location could be a nice one. So don't rush into decisions. Evaluate your environment before any decisions.

D) **Think before you act.** Always think before you act. Think about the consequences before embarking on a project. This act alone will help you minimize failures and will enable you to be prompt in decision making.

SEEING POSSIBILITIES IN TOUGH SITUATIONS.

We cannot escape tough moments in life. Tough moments come and go. Tough moments are always there when we carry on important projects. Every successful person you see out there that has accumulated wealth has had tough moments. How you react in times like this depends entirely on you.

Some people go through depressions when they encounter tough situations. Some even commit suicide in tough situations. For them the only solution is to take their own life so they can be free from such moments.

Tough times are moments in our lives when we may have lost everything we ever worked for. When our business crumbles and we find ourselves starting over again. Tough moments cannot be avoided; they must come in one way or another. We have to prepare for them when they come. Now let's see the 7 types of tough situations and their solutions

8 types of tough moments and their solutions.

The Death of a loved one.

Death is a force none of us can escape. Everyone must die and return to dust. At times our loved ones are hit by death and this breaks us to the core.

Solution: The solution for death is to prepare your loved ones by letting them know about eternal life and the love of Christ. It is not just about death, but where you will spend eternity after death. Knowing your loved ones are with Christ in heaven is a way to achieve peace of mind after they are gone.

A Crash in business.

A crash in business is another devastating factor that can break one completely. If care is not taken one can commit the unthinkable. Many businesses crash within the first 5 Years.

Solution: You need to have extra cash kept in a separate account. You need to have what every millionaire calls “Back up” money. This money could help you bounce back in case of any eventualities in your business.

A Loss of Job.

There are many factors that can contribute to a loss of Job. Job reshuffling can lead to a loss of job. At this level many people are broken and thoughts on how they will now take care of their family’s start flooding their minds.

Solution: Aside from your job, you can start a business. If you don’t have the time to run or take care of the business, assign someone to take care of it. This ensures that incase of any loss of your job, you will have something to take care of your family for the moment.

Sickness of a child.

We all want to save money so we can accomplish greater projects. But at times we have some in our homes sick and we have to take them to the hospital or clinic. The little we have saved is gone for hospital bills and we find ourselves moneyless.

Solution: Open a separate bank account for emergencies. This account is solely for any family problems. With this strategy you easily solved problems related to health issues coming from a child.

Loss of Property.

Loss of property is another major factor while most people go through depressions. If you have ever lost a Property you will understand how painful it is. It could be due to flooding, or any other natural disasters. For some people it is even due to debts.

Solution: The solution for a property loss is to have your properties insured. Insuring your properties is the best thing to do. So that in case of any property loss you can recover them from your insurance company.

Illness.

Though we all want to be healthy, yet there are times we are ill and we lose the ability to work or carry on with any projects. We are glued to the bed and there is absolutely nothing to do. For some people it is even worse. They find themselves paralyzed or with a stroke.

Solution: In times like this don't be afraid. Just see yourself getting better and believe the power in your spirit to take you out from such situations. You can also see a Pastor for prayers, because it could be a spiritual problem.

Divorce.

Divorce for some people is really a tough situation. Seeing someone you have spent almost half of your life separating yourself from, it's very painful. Most people have even undergone depression because of divorce.

Solution: Always see a marriage counselor whether you are having issues with your partner or not. Attend seminars on marriage. These seminars will help you in times of marital challenges. Learn all you have to know about having a successful marriage.

Debts.

Debts are another reason most people go through tough times. According to Mr. Vincent Bakabe Baduma, never borrow money. Try your best to raise the money you need without borrowing.

Solution: Don't borrow money on a regular basis. Too much borrowing limits your brain power. Try as much as you can to use your brain to raise money for business or for that project you aimed at. Secondly, you can also develop the power of asking. It's better to have what you want by asking than borrowing.

You have to see possibilities in every situation. Every problem has a solution and never get yourself depressed by a tough situation because the solution and blessings that accompany it are always bigger.

ONE READINESS FOR ERRORS.

To be successful in life you have to be ready to commit errors. Errors are inevitable for all those who work towards a target. If you are afraid of errors, you will never become a millionaire. To be successful in life, be ready for errors. We just try our possible best to solve those errors immediately once they are committed.

There are different types of errors in life.

We can avoid some certain types of errors from happening but there are some things we can never avoid. Some errors that happen out of our control. Below we will be discussing the different types of errors and their solutions.

Employees.

As a manager of a company, you have to know that when you employ people, there are times these workers will commit errors. A manager must understand errors are inevitable. Have an understanding mind towards your employees when it comes to errors. Don't be too quick to discipline them because as humans we are liable to make errors.

Solutions: Make sure you train your employees very well. Even if they are competent and fit for the task, always hold some company seminars to mold them up. This will help them minimize failures in your company.

Miss calculations on company budget.

There are situations where you will find a miscalculation in your company budget. Some of these errors could be very serious in the long run. Whether it is

on the budget surplus or budget deficit. Some of these errors cannot be avoided totally.

Solution: Make sure you hire a good treasury when it comes to managing budget. As we all know, budget is an essential part in running any business. Let your financial board be competent and make sure they know how to manage financial issues.

Human Errors.

Humans in general commit errors. All we do is to learn how to minimize them and help perfect our skills so we avoid them. Whether you are a director or Manager of a company, you will commit them. Let's understand each other when it comes to this. For example, someone can step on your toes whether on the walkway or anywhere. Don't react promptly, it may be a human error.

Solution: Try as much as possible not to do those things that affect others, if you find yourself in this type of situation, like flashing water accidentally on a neighbor, learn to say "I'm sorry". It's a sense of maturity.

Family Errors.

Family errors could be, when a child breaks a plate or accidentally breaks the television or pulls something on the ground at home and it gets broken or bad. All these are errors that cannot be avoided. Every family experiences some things of this type which are all errors.

Solution: Keep things in a safe place so children can't get close to them. Always follow up and advise them on the importance of maintaining a healthy home.

Error in Judgment.

Error in judgment is a very common type of error. At times we have accused people without them having done what we are accusing them of. No wonder the holy book says “thou shall not judge”. Judges in courts have condemned people who are innocent and never committed any crime.

Solution: Before you judge others make sure you find out if what they did is really true. You have to be sure of the crime they committed. Don't accuse people for nothing. Errors in judgment at times are irreversible.

Marital Errors.

Marital errors are also one of the errors that are common in today's society. Accusing your partner of cheating and looking after another. We divorce those who are God sent, only to open our hands to devils in sheep clothing.

Solution: While some errors cannot be avoided, marital errors can be avoided. Don't assume your partner is cheating on you, if you have gotten no proof. Mutual understanding between both partners is very essential for a healthy home. Bringing up your children in a healthy environment is the best thing you can do as parents. So build your marriage on trust, love and understanding. As a couple learn to say I'm sorry when you commit an offense against each other.

Fatal Errors.

Fatal errors are errors that should be avoided at all cost. These are errors that are irreversible. Some fatal errors can be avoided while some cannot be avoided. Fatal errors could even lead to death. Playing with a friend and you mistakenly hit him on the head and he convulsed. Doing some shooting practice

and you mistakenly kill someone who was passing by. A judge condemns someone who was innocent and he spends all his life in prison. Employing someone you trusted but at the end he runs with your company money and everything crashes.

Solution: Love everyone you come across. Love will help you escape such errors. Always display a positive energy towards your friends and your environment. Avoid negative people, because their negative energy could lead you into trouble. Be at home at the right time. Avoid negative places and don't stay late at night.

READ BOOKS ON SUCCESS.

Reading is the most efficient weapon for a successful living. Every successful person we come across is a good reader. Some of them spent several hours a day reading. Reading sharpens your mind and raises your understanding on some aspects of life.

Mr. Vincent Bakabe baduma was a good reader. No wonder he was so successful and humble to a fault. He had his own personal library at home with a lot of books. He read books on how to be rich, prosperous and live a healthy life.

If you want to be successful in life, you have to read books. Reading books is very important. A doctor read books on his domain to become one. A technician read books on his domain to become one. If you want to be rich, read books on riches. If you want to become a millionaire, read books on how to become a millionaire.

Below we will see the 5 things reading does for you. How you too can start using reading as a weapon to win all your future battles. You don't have to just read any book but the right books. Whether it is a book on how to succeed or how to become a millionaire, all is good and very important.

Importance of Reading Books.

The number one reason for reading is that reading impacts you with ideas. You gain fresh ideas on some certain aspects of life. Maybe you have been thinking on how to raise your income, or pay your debt. Reading a book on the subject can give you the ideas and solutions you need. This is what reading does for you. "Impactful ideas".

Secondly, reading books quicken your understanding. There are people whose understanding is very dull. They know nothing about caring about their children or Spouse. They believe money is bad and that having too much is a sin. A single book could change that and transform your thinking completely about money and teach you how to solve your family and financial problems.

Thirdly, reading raises your understanding. There are people who have never gone to school or obtained a diploma but have a higher understanding when it comes to money. Many of them understand this principle. To have a better understanding about money and life in general, you have to read books. Read more books. Read again and again.

Reading books makes the reader become more like the writer. If you spend most of your time reading books on millionaire mindset, there is a possibility for you to become a millionaire. Your mind is fused with that of the writer. Suddenly

you start reasoning like him and find yourself doing those things that made him successful.

Firth, reading books is a source of encouragement. When all hope is lost, pick up a book and start reading. You could find an important piece or words of encouragement.

The importance of reading is to sharpen your understanding on what you want to become. Giving you a view about life and money. Giving you solutions of life. Making you sit on the shoulders of giants. You learn, know and master what took others years to learn and master. Become a Reader.

AVOID THE NEGATIVE.

Negative things, negative people and negative environments are to be avoided at all cost if you want to become a millionaire. Riches have more to do with the way you live your life. The type of friends you keep and the type of places you visit.

On this topic I will be talking on the different types of negativity and how to identify them. Identifying them will help you avoid them. Rejecting them completely is the wisest thing to do.

The 10 types of Negativity to be avoided at all cost.

1} Dream Killers. The most dangerous are dream killers. Dream killers are those who tell you not to believe. Those who discourage you each time you want to take a step in life. They work harder at times to see that you fail. They mock you at every failure you have or challenge you go through. They are often close friends or relatives. Flee away from this type of person.

2} Weapons of Discouragements. There are so many factors that can discourage someone on his way to destiny. It could be a friend, family or even a television program. If you feel someone or something is acting as a force of discouragement in your life, cut off from that person or thing.

3} Polluted Environments. Some people don't actually know their environment controls their thinking. Where you stay and the type of people you mingle with there, will determine your financial status. If you're living in a poor environment, the solution is to visit rich environments and neighborhoods from time to time. Watch videos on good buildings and millionaire lifestyles. The objective is to change your thinking.

4} Unfriendly People. The reason you should avoid unfriendly people is this, they can make you miss out on some important helpers or partners. They will tell you this or that person is not good. Most unfriendly people are poor and should be avoided at all costs.

5} Looking for Problems instead of solutions. There are people who are fun looking for problems. Everywhere they go is a problem. You can easily identify them. They don't find solutions to problems but only cause trouble left and right. Avoid such people and never bring them close to you.

6} Negative News. Negative news on the financial crisis causes fear in most people. This fear has the tendency to weaken your mind for the accumulation of money. News on wars and shootings and how the world is going bad every day are weapons that are all programmed to weaken your mind. Avoid the negative news.

7} Unfriendly Environment. Unfriendly environment is different from a polluted environment. There are environments where every person you meet and see is a troublemaker. You can't focus on your objectives. Is either this or that neighbor got you angry? Your life is tense all the time. Avoid such an environment. If you are already living there make sure you look for another place.

8} Pornography. Pornography is another negativity that should be avoided at all cost. Many young people today get into porn and this affects their lifestyle. Pornography remove part of the human in you and weakens your mind in the accumulation of wealth.

9} Negative thoughts. The reason most people are poor is due to their thoughts pattern. Negative thoughts towards money are rendering them poor. Negative thoughts towards others is making them too loose important allies. People who could have done something for them by helping them financially, are being repelled by their thoughts.

10} Drunkenness. The bible says "he that loves wine shall be poor". Drunkenness is the reason why most people are poor and cannot take care of their families. If you want to be rich, avoid drunkenness and don't keep company with those who indulge themselves with wine and strong drink.

MR VINCENT IDEOLOGY FOR A SUCCESSFUL LIFE.

He believed success could be achieved through hard work. A man that should not work should not eat, he often says. Mr. Vincent after working for another man decided to start his own enterprise. He put exactly the same energy he had when working for another. If you aspire for success and become a millionaire, you have to work hard.

Mr. Vincent believed in team work. He believed in a unified work. According to him no one can succeed without a team. When you have a team of devoted people that work in mutual understanding towards each other then you will be sure of success.

Some bosses lord over their workers and shout at every mistake they make. Mr. Vincent believed a true leader has to be humble and serve others. He believed it is by serving others that you get equal respect from them.

To succeed you have to be grateful for the little success you have achieved so far. Continuously be grateful to God for the things he has already done for you. The more grateful you are; the more success you will achieve. In everything give thanks.

THERE IS NO GROWTH

WITHOUT MISTAKES

3

PERSISTENCE

IF AT FIRST YOU DON'T SUCCEED

TRY TRY TRY AGAIN.

The man who persisted his way into fortune.

Those who want to become wealthy must have the trademark of persistence. Mr. Vincent Bakabe Baduma was a man who persisted his way into fortune. Lone child of his parents with no inheritance handed by the latter, he still managed to become one of the wealthiest people to walk the face of the earth.

He was born into an Oroko family. He grew up in poverty and was sponsored in school by an Uncle who took him in, as his own child. After completing his secondary education, he went to Nigeria to further his studies and had his diploma. Returning to Cameroon he was well prepared to face his future.

Many companies came to him but he rejected them saying he needed hand work. CDC at the time needed him as a manager but he refused. He knew becoming an entrepreneur is better than working for someone else or the government.

He finally worked with a white company in watch repairing and sales of watches. When he had saved enough money, he decided to travel abroad to expand his knowledge as an Entrepreneur. After having studied in Suisse and obtaining his diploma as a watch engineer he returned to Cameroon.

It is at this juncture that he decided to start his own enterprise called “United Lovers Enterprise”. His goal and objective was to have workers who are united in purpose. People who speak the same language of work and are determined for success.

Despite all his challenges at the beginning of his life and during his stay in Douala. Mr. Vincent Bakabe Baduma persisted his way into fortune. Not long enough, the money started flowing. The Enterprise recorded mind blowing profits. The profit from his enterprise enabled him to buy lands, build rental properties, own vast cocoa farms which still generates money up till date. Mr. Vincent despite his little beginnings, persisted his way into fortune. He understood to be wealthy you have to become your own boss. You have to keep going despite opposition forces.

NEVER GIVE UP.

People give up for many reasons. But in life if you want to succeed you should never give up. Giving up is not an option for any person that desires success and wants to become a millionaire. Millionaires or successful people have learned when things get tough it simply means success is around the corner.

5 Reasons people give up in life.

1} Tiredness. Most people give up in life due to tiredness or fatigue. When a man is tired he cannot think Properly. You have to always boost your energy every morning. Make sure you have enough rest. If you find yourself tired because of work, take a break and have a nap so you recover your lost energy. Tiredness could lead to a lot of mistakes at work. Poor work means poor delivery and you end up abandoning a great project that would have caused a lot of impact in your life.

2} Mockery. Mockery is another major factor why most people give up in life. When they take a project and mistakenly blundered, they get mockeries from friends and sometimes from family members. This inability to overcome mockery makes them give up. You should never be bothered about what people say or think about you and your projects. Even if you fail, or the project did not go as planned, never give in to mockeries. Your projects and goals of who you want to become are weapons that should defeat all opposition.

3} Continued failures. Most people give up in life due to continuous failures. Every project they carry on or plan they take leads to failure. Because of this continuous failure they give up. But you don't have to give up no matter what you experience in life. Negative experiences are good because they help sharpen your mind.

Failures are the birth rock to success. Keep trying no matter how many times you fail. Don't give up.

4} Lack of strong desire. Lack of a strong desire is another factor people give up in life. When your desire to be rich and successful is weak you will achieve little or practically no results in your work. Having a strong desire keeps you going no matter the failures you encounter. Your eyes are set on your objectives and you are unshakable. To develop a strong desire, you have to set goals and be sure of exactly what you want to become.

5} The Inability to think. Lazy people refuse to think their way into success. They take action before they think. Their thinking pattern is weak and they are not creative in their thoughts. You have to develop the ability to think your way through to success. Before you take on any project, you have to think first on the pros and cons of such a project. Thinking your projects through before starting gives you an insight. You may receive supernatural working patterns even before you embark on the project. This ability to think alone before starting your projects could change your life.

WHEN ALL FAILS.

There are times we have done all that we needed to do in order to succeed but success is not forthcoming. At this juncture when all fails what should be my reaction? When my knowledge is exhausted and my ability to work has been worn out. I have done all that is needed to be done. I knew this time around I would succeed but still I failed. What should be my reaction?

When all fails try to laugh. Many don't know the power of laughter. laughter has the tendency to quicken your mind and help you master depression. Instead of being worried and getting depressed and sad, laugh your way out. Laughter sends a message to the devil of you saying "I am not done yet". When all fails, laugh. Look at yourself in the mirror and laugh.

Look for plan Z. Look for plan Z when all fails. This means that you are not done yet trying. It's only the mind that cheats on you by making you believe all is over with you. We have heard of Kentucky fried chicken. The colonel who started it failed several times. At 70+ age he still believed in plan Z. He became a millionaire at age 70+ from this business.

Seeking advice from experts. When all fails seek advice from those who have succeeded. Try to find out what they did that you never did or is not doing presently. A simple piece of advice can motivate you and galvanize your energy into another level of spiritual awareness on what to do in order to start succeeding.

Take a Break. When all you have done to achieve success fails, take a break. There are times when taking a break is necessary regardless of what others say or think. Taking a break may bring to your attention some close things on why you are not succeeding in your projects and life in general. Take a break and have a rethink and re-strategize. Check out the reason for the continuous failures in your life. Believe me you will get an answer. When it's done, don't waste anymore time just bounce back.

Start over. When all has failed, should I just sit down doing nothing? The answer is "NO" You have to start all over. Be ready to fail even 1000 times but the

essential and wise thing to do is not to give up. Thomas Edison failed several times but never gave up and today we enjoy the fruits of his patience the “incandescent bulb’. If he gave up, the world would have still been in darkness. Be ready to start over and over again when all fails.

PERSISTENCE THE MOTHER OF SUCCESS.

Persistence is the mother of all achievements. Persistence is the mother of success. People who succeeded have this in common the “spirit of persistence”. Persistence is different from patience. Many people have the virtues of patience but lack the virtues of persistence. Patience is good but very minimal in the accumulation of wealth.

Patience can offer you a job but persistence can keep the job. Patience can offer you a good business but persistence can make you continue running the business in the midst of tribulations. Here is an illustration: 2 people are waiting for a contract at the desk in front of an office. The contractor does not show up on time. One person waited, and waited and then left in total discouragement. While the second person keeps waiting despite the delay of the contractor. Then he came and signed the contract with the fellow that was still there. The first fellow had patience while the second had perseverance as a virtue. That’s the difference between a patient person and a persevered person.

Persistence is the mother of success in 6 ways.

Persistence is the mother of success and can only be compared to a mother and his baby. Imagine yourself being the mother” persistence” and success is your

child. The reason you need the virtues of perseverance can be compared to this scenario.

The 9 Months law of fruitfulness.

Conceiving and putting to birth at 9 months is a normal thing for every woman. When it's below it looks strange, and when it's above 9 months it's still strange. During pregnancy the woman has all of troubles. From vomiting to loss of appetite. It is a very challenging moment for every woman. This is the same thing with success. You must carry it for 9 months, it could be 9 years. One thing is sure you must carry it and have all the trials and problems that come with it.

Sleepless Nights.

A mother who just gave birth has sleepless nights due to the shout and cry of the baby. She will get up at night just to check and see if her baby is okay. She is worried about a single noise coming from her babies' room. She is thinking on some occasions why is her baby crying like this? This gives her Sleepless nights.

Success, just like a baby, gives sleepless nights. You have to check on your work. You have to check how much profit you made the day before. You think about how a colleague messed up with you or what your boss will say to you the next day. All these are actions to really test your perseverance and if you are really fit for the success coming your way.

The laws of breastfeeding.

Breastfeeding a child is another law for a mother. Every woman was given a breast by God so they could breastfeed their babies. This is another process where the baby sucks your own substance. Taking out strength from your body. Some

women have to eat well before breastfeeding their babies. Despite this she will never give up on her baby even if she has to use her last energy to do so. This goes the same way for success. You have to nurture your work and spend all your substance on it. You have to use your last money to solve a problem at your work. Just like a woman would not give up on her baby, you too should never give up.

The love of a Mother.

Despite the pain and all that the mother goes through she still loves her child. She prefers to go through all those things because she knows she is doing herself a favor by raising up the next president, minister and great person in society. You too when you undergo all those challenges, it's a way to test your motherhood. To really see if what you do you really deserve the success. But if you win the test of love towards your goals then you will find success.

The testing period of humans.

A mother is being tested on this to see if she is fit for the next task. If she is careless she won't even see the child's next move or growth cycle. We have seen mothers lose their babies due to carelessness. A mother also tests the child on many occasions like how to say: papa or mama" She trains her child on how to walk and many others. Every human must be tested. At times what you face in life could be a test to see if you are fit to have millions. How you react at the beginning of your career has a very determining factor on your success in life.

Life is in stages.

I want you to know that life is in stages. Just like the growth of a child is in stages. You won't escape or skip a stage. A mother has to persevere for her baby's

growth until he becomes a man. You too have to persevere with the growth of your business or projects at hand. You will have to take every life exam before success comes. Perseverance is the mother of success.

DISCOURAGING FACTORS.

There are many factors that can really discourage people from engaging in activities that are life changing. The world we live in is full of so many types of discouraging circumstances that happen out of our control. But despite this some people have emerged winners in their lives and activities. Our role is to identify those factors and do our possible best to overcome them.

Lack of capital to start a business.

The lack of capital could be a very discouraging factor. Many people are discouraged in life due to the fact that they want to start a business or engage in a project but they lack the capital to start. Learn how to raise money for your business. The most powerful weapon you have is to ask. Asking is a weapon many don't know. Think about who you can contact, when thinking about how to raise money for your business. Remember the bible says "ask and you shall receive".

Lack of support from relatives and acquaintances.

Lack of support from relatives is another discouraging factor and a more serious one. There are times we expect more from them but we get nothing. You must learn to depend solely on your ability to succeed rather than to depend on others.

Embarking on a project others are already actively involved in your area. There are times we want to start a business but those businesses are already on every corner of the street. We want to open a phone booth or open a shop but everyone has them around us. The solution for this is to relocate to another area where there are limited competitors.

Job rejection.

Job application rejection is another discouraging factor for most people. It is really hard braking when you hear the word 'NO' again and again. The solution for this is to become your own boss. Start your own business and be free from this type of rejection.

KINGSHIP TRADEMARK

Perseverance is the trademark of kingship. Those who persevere and finally succeed are considered and treated as kings. Many want to be respected but don't want to take the test of life. They don't want to persevere in their work. What they don't know is that perseverance is the trademark of kingship. You should know this from today.

If you want to be valued in society and life in general, you must have this trademark. The only trademark on the life of millionaires. Only trademark on those who said "no" I won't give up and I won't give in. the only trademark on the life of people who have amassed wealth and riches. The trademark was on Mr. Vincent bakabe. This is the only trademark governing champions.

We often see successful people around us and we admire them in their field of play but most of them spend hours upon hours on training. Success doesn't just

come from nowhere. Someone paid the price before succeeding. They went through the heat in order to embrace the cold.

If you too want to be respected and treated like a king, you must never give up. Perseverance is the trademark. Perseverance is what you need. Work hard and be steadfast in your work. Remember perseverance is the trademark of kings.

MR VINCENT IDEOLOGY ON PERSEVERANCE.

Mr. Vincent was a man who believed anybody who wants success should never give up. He believed successful people should push on no matter the darker days. He believed light is always at the end of the tunnel. He had the habit of saying if at first you don't succeed, "try, try, try again". A man must keep trying in the midst of setbacks and disappointments.

According to Mr. Vincent you should be grateful to God for everything. According to him perseverance should go hand in hand with gratefulness. Always be grateful no matter the situation you find yourself in.

**Perseverance is a virtue in
the accumulation of wealth.**

4

Information

Information the roadmap to,
becoming a millionaire.

Information is one of the birth rocks to success and becoming a millionaire. Every man that has accumulated riches has mastered the power of information. Without information you will be broke and stranded. You need information if you want to succeed in life. An era in which everything is now fast, technology has taken over the world is the main reason why you need information.

PROFESSIONAL INFORMATION.

Professional information has to do with the type of profession you are in. whether you are a nurse, doctor, teacher, lawyer etc. You cannot just wake up one

morning and decide to become a nurse or doctor, it's not possible. You need to acquire the necessary information.

The reason for the many problems in our society is due to the fact that many people lack the necessary information to operate in a particular field. Many areas of a country's economy crumble because we have incompetent economists with the lack of appropriate information.

For a society to function well we need people who have acquired the necessary information to operate in such areas.

Reasons why Professional information is important.

Compétence.

The primary reason why professional information is important is due to the fact that you work with competence. Competence is very necessary and important in this world. No manager or director will want to recruit an employer without competence.

Growth.

Professional information leads to growth, whether mental growth or physical growth. The growth of a company or enterprise has a lot to do with the growth of an individual first. It starts with the people before spreading in every sector of the company.

Ability to solve Problems.

Our world today is filled with so many problems. It could be a general problem or an individual problem. Your ability to solve problems has to do with your professionalism.

Promotions.

Without a balanced professional information, you cannot be promoted into some responsibilities. You will need management information to be promoted as a manager. This is the reason why most people are down the ladder while their colleagues keep getting the promotions.

More Money.

Professional information leads to promotions and promotions leads to more money. If you want more money at work, you have to learn and acquire the necessary information at your workplace.

Honors and Distinctions.

Wondering why some people receive honors and distinctions while others do not receive despite their long term? This is so because they lack the necessary information or knowledge which will give them such honors.

BUSINESS INFORMATION.

A businessman without business information is going to achieve little or no results. One of the reasons businessmen need information is due to the fact that they could be aware that every business has challenges and that as a businessman you must be ready and prepared to overcome the obstacles on your way.

Most businesses collapsed within the first 5 years of its existence. It is believed if your business passes this 5 years' stage then it will survive. Business Information is important because it will help you overcome these challenging phases of every business.

Management.

Effective management has a lot to do with the type of information you have about your business. The more information you have, the more you will be able to manage your business appropriately. Without proper management a business cannot survive 5 years.

Identifying key strength.

A manager or employer with proper business information will be able to identify those workers with key strength. These are people who are capable of adding more value into your company and business.

Solving Business Problems.

With the proper business information, you will be able to solve problems that come up. Problems about finances or problems between co-workers.

Managing Customers.

There is nothing as frustrating as losing a regular customer. Without the proper knowledge on how to manage your customers you will lose them to someone who knows how to manage customers. Knowing how to manage customers comes along with your knowledge on business information.

Human Relations.

Business information helps you to understand human relations. The relationship you build with your customers is as important as those you build with your employees. Building a peaceful and understanding atmosphere is important for the growth of every business.

Impacting knowledge.

With the proper business information, you will be able to impact knowledge on others. This knowledge could be through business seminars for workers. Teaching your team on politeness and on little things like smiling to customers. Displaying a friendly and conducive atmosphere to customers.

MARITAL INFORMATION.

Marriage is another key factor that will determine whether you will be rich or not. Marital information is very important in today's society and those young people preparing for marriage. Many people are poor today because they made the wrong choice and chose a wrong partner.

If you are a young vibrant youth who aspires to get married, you have to understand that wrong choices in marriage can either break you or even kill you. Your dreams could be shattered if you married the wrong partner.

You have to know the person you are getting married to. You have to be very close to observe if you can cope with such a person's behavior. You must know the things you can support from your partner and the things you cannot support.

Also you have to attend seminars on this subject. Attending marriage seminars is another way to get information. You could learn some tips that may be of great help to your future partner and what is expected from you as a couple.

A} How to Prepare yourself for Marriage as a Lady.

Work on your character.

Character is a very important component when it comes to marriage. To get yourself prepared you will have to work on your character. Try to ask those close to you if they can identify anything in your character that is not good. At times we can't see ourselves except those around us. Once they help you identify it, work on it immediately.

Learn to cook.

As a lady you must learn how to cook. You must be aware food is very important in marriage. If you don't know how to cook, make sure you learn it before entering into someone's home. The reason for poorest marriages is due to this "the woman can't cook".

Seek Advice.

Don't seek advice from those who have failed in marriages but those who have been successful in it. Let them tell you their secret. Don't compete with them. The best thing is to seek their advice before embarking into marriage.

Don't Pressure the Man.

This goes to those ladies who are already in a relationship preparing for marriage. Don't pressure the man while in courtship. Things like buy this and buy that should not happen.

Attend marriage seminars.

How many ladies today can attend a seminar on marriage? The truth is they are very few. Prepare yourself for marriage by attending marriage seminars. You could get useful information that could change your way of thinking about marriages and life in general.

Be a lady of substance.

Have something doing has a lady. Don't just sit down waiting for a man who will marry you and change your life. Find something to do. Get yourself busy with something. It could be a business, or a job.

Read Books.

You have to read books about success in marriage. Books on how to be successful in your marriage. Buy a book and read and become a lady with marital information. You will be far ahead of others when it comes to having a successful marriage.

B) How to Prepare yourself for marriage as a Man.

Have a vision. You need to have a vision for yourself and that of your family. Many men go through life without any vision. A man without a vision is not prepared for marriage. Have a vision for your life.

Set Realistic Goals. Before you embark into marriage as a man you must have goals. Goals are a roadmap on how you want your life to be shaped. Take a piece of paper right now and start setting your goals. Especially marital goals.

Seek knowledge. A man without knowledge is not ready for marriage. You have to attend seminars and learn parental roles and how to treat a wife. A man should know he has no right to raise his hand on his wife.

Be willing to learn. Some men are unteachable. This is a very serious disease a man can possess. You must be teachable especially when it comes to marriage.

Be financially stable. A poor man means an unhappy family. Every man who wants to get married must prepare himself financially. You must have a source of income. A means to take care of your family and make sure they don't lack daily bread.

WHAT EVERY MARRIED COUPLE SHOULD NEVER DO.

Never refuse sex. Sex is the binding factor in every marriage. In other words sex is the engine of marriage. Without sex a marriage is bound to fail. Most divorces today are due to poor sex between couples. Never refuse your partner sex except in the case of mutual understanding.

Never refuse Food. Never refuse food to your wife or husband. I have seen husbands refusing to give money for their wife's to cook and I have seen wife's refusing to cook or serve food for their husbands. Never starve one another because of misunderstandings.

Never be arrogant. The wife must learn to submit to her husband and the husband must never raise his hand on his wife. Arrogance is the cause of many divorces today.

Never quarrel in the presence of your children. A married couple should never quarrel or raise their voices in the presence of their children. Every marital problem should be solved in the closet.

Never fight in the presence of your children. Thinking that some married couples exchange blows in the presence of their children is unimaginable, yet true. It should never be the case in your home.

Never be stingy. Some couples are stingy. There is no sharing especially when it comes to money. The man hides his account balance, the wife vice versa. They prefer to staff the children just because they don't want to share. I recall a story where a man divorced his wife when he discovered his wife was a millionaire but allowed their child to die because of a small hospital bill that cost thousands. Don't be stingy.

Never be lazy. It may shock you but some married couples are very lazy. Watching television from morning to evening. The man is always drunk and the woman useless as well. The results of their lives are reflected on the lives of their children. Avoid laziness at all costs.

RELATIONSHIP INFORMATION.

Relationships are very important in the accumulation of wealth. A man who wants to be rich and wealthy must choose his friends wisely. As it is clearly said “show me your friend and I will tell you who you are”.

Many people don't know those around them influence the way they think and their environment shapes their behavior. Many children grew up with good parents but end up doing drugs. This is because they find themselves in the wrong environments where they must do like others in order to belong.

Avoiding toxic people is the best thing that could happen to a man. Toxic people are very dangerous in the accumulation of riches. They indulge themselves in alcoholic drinks, cigarettes, and are trouble maker's in communities. So avoid toxic people if you wish to live a happy and prosperous life.

You have to choose your friends wisely if you want to be prosperous and wealthy. Those you associate with all the time have a great influence over your life. You become more like those you walk with. That is why the Bible says “evil companies corrupt good manners”.

If you want to be rich and successful, you have to be in the company of rich people. If you can't associate with them physically, you can read their books and watch their tapes. Let your mind be filled with glorious images of gigantic buildings and millionaire lifestyles. The impactful power of these video images could change your life forever.

Every successful person understands the importance of trust. You cannot succeed in business if there is no trust between you and your

customers. This is true with relationships. You have to gain people's trust. People must trust you before helping you or be a business partner with you.

If you want to become a millionaire, avoid visionless people. You have to walk with those with vision. You must build relationships with those people who can challenge you with their lives. And not with people who sit all day to talk about football and politics. Associate yourself with people of vision and see how great a difference this will make in your life.

Relationships start with the family. Building a sound relationship starts with those around you. Never compromise your family with friends. Friends may abandon you when you need them most but family is always there even in the midst of storms. So every man should first learn to value their families. As the saying goes “charity begins at home”.

Put your family first in everything. Love and cherish them. Love your spouse and children. Take care of them, provide for them and always make them happy. They are the only ones who bear the heat with you, so they need to enjoy when you are at your best too.

Find the benefits in every person. Before going into a relationship you must find the benefits. What will you gain in such a relationship? Is such a relationship a blessing to you? What are the profits? Relationships should never be one sided but must be mutual. That means for a relationship to work it has to be 50/50.

You must cultivate the habit of getting the necessary information before associating yourself with other people.

Reading to acquire skills and knowledge.

Reading is very important if you want to acquire knowledge and be skillful in your work. Increasing your knowledge base is very important for every man who desires success.

THERE ARE 7 TYPES OF KNOWLEDGE.

1} Physical Knowledge.

Physical knowledge is knowing one's self and others. This type of knowledge has to do with physical objects that we see and has no real financial impact when it comes to money. Physical knowledge has to do with things like eating food, drinking water. You don't need to be taught, they are just natural. You just know them and how they function.

2} Spiritual knowledge.

Spiritual knowledge are things that are beyond the physical. With this type of knowledge, you don't see things with your physical eyes. This type of knowledge mostly works on the basis of faith. For instance, a man believes making \$100,000 Profit in a month is possible and he goes out with confidence and then comes back with results. This is spiritual knowledge and has a lot to do with accumulation of money.

3} Financial knowledge.

Many people are poor because they lack financial knowledge. Financial knowledge is very important for the accumulation of riches. You have to increase your financial IQ and intelligence of money. For example, some people believe in working for a boss but someone with financial intelligence knows becoming an entrepreneur is the only way to become rich and wealthy.

4} Skillful Knowledge.

Skillful knowledge has to do with one's ability to discover the skills he has. Many people don't even know they are skillful in certain areas of their lives. Your skills may be that breakthrough you needed for an open door. Discover your skills and make profit from them. Ask someone to identify them for you and make good use of it.

5} General knowledge.

General knowledge is useless in the accumulation of money. General knowledge has no tangible results when it comes to money. This is knowledge acquired by everything we have come in contact with while growing up. Also it could be a particular subject in school. Subjects like History, civic education, biology and many others. They are completely useless in the accumulation of money.

6} Natural Knowledge.

Natural knowledge has to do with those people who are born genius. They have a natural type of knowledge due to high IQ. But this type of knowledge is also useless in accumulating money. We have seen “A” students working for the “C” student’s companies as bankers, lawyers, treasurer and so forth.

7} Practical knowledge.

Practical knowledge has a lot to do with handwork. These types of people are not intelligent when it comes to reading books and long topics but are very smart when it comes to handwork. They love practicality and in this domain they outsmart the people with general knowledge. Most of them become self-employed like carpenters, builders and many others.

Most of this knowledge can make you a living, like someone who studied history can become a historian but for the accumulation of riches and wealth, only **2 types of knowledge** are necessary, that is **Spiritual knowledge** and **financial knowledge**. Work effectively on these **2 types of knowledge** and you will see a financial speed in your life.

SUCCESS BEGINS FROM THE

MIND OF MAN.

5

IMAGINATION.

A Man becomes what his,

Mind is made up of.

Imagination is a power and a gift God has given to mankind. While some use their imaginations to have everything in life, others use it to destroy themselves. Imagination can either build you or destroy you.

What you think often during the day matters. If you think of poverty, then be ready to be poor.

There are external factors that control one's imagination, like watching a television program or having a very bad day at work. someone just insulted you or you had a quarrel with a colleague at work.

Regular Imagination.

Regular imaginations are your daily imaginations of thoughts and images. These can be images that flash through your mind during the day. It can also be thoughts from an experience you had recently whether positive or negative. We cannot do without regular imagination because whether we like it or not we must imagine something.

Regular imagination has no creative power; they can neither build or construct a better thought pattern. Have you wondered why someone will just be staring at a spot without blinking? And when you ask them "what is wrong? you hear things like "I just thought about this person or this thing that happened yesterday.

Most people have been summed up only on a regular thought pattern, they know nothing about constructive thoughts pattern. They allow every thought and image to float through their minds during the day. What they don't know is that,

allowing negative images about poverty in their minds may be the main reason why they are the way they are, “poor and broke”.

We cannot determine thoughts and imaginations that come into our minds but we can choose which one to allow in our minds. Some people digest thoughts of illness, death and lack and get satisfied. Adding emotions to these thoughts could be very fatal for you.

Choose the type of thoughts to allow in your mind. Choose the positive, vibrant and constructive thoughts over negative, low self-esteem, failure thoughts. When a negative thought shows up in your mind, replace it immediately with a positive thought.

We earlier said regular imagination has no creative power. We cannot do without them. They are always there like the fishes in the sea. They are abundant in our minds whether through words or through images. We just have to choose which one to endorse and allow in our minds.

This scenario can be compared to someone watching television and immediately he sees a program he doesn't like; he changes channel immediately. This is how you are supposed to choose the images that float your mind during the day. Replace the negative with the positive.

CREATIVE IMAGINATION.

Creative imagination has turned ordinary people into extraordinary people.

Creative imagination is a great discovering method applied by most men who have accumulated riches.

Mr. Vincent Bakabe applied creative imagination to amass wealth. He often tells his children to always meditate and release positive energy around them. Many people ignore the power of creative imagination. And some don't even know what creative imagination is all about. In this topic you will learn creative imagination and how to practically apply it for the accumulation of riches.

You will be amazed by how much power you have in you and how to unleash that power for your good. Man is spirit and anything spirit cannot be destroyed. The universal laws apply to everyone, whether you know them or not. Just like the law of gravity that says "everything that goes up must come down. If you are ignorant of this law and you jump from a 5 storey building you will still crash. Either you will be dead or badly wounded.

Man as you know is made up of a spirit living in the flesh. The spirit of man trapped in his body is a mighty force that can transform man into anything he desires. If he can connect his spirit with the spiritual laws of God. This connection is possible through creative imagination.

How creative imagination is done.

1} Look for a quiet spot where no one can disturb you. A place void of any distraction from others. It could be your room, parlor, kitchen. Any quiet area in the house or out of the house.

2} Close your eyes and calm down your mind. Relax your muscles and take a deep breath twice. Take air through the nose and release from your mouth. Do this twice to calm your mind and then stop.

3} See yourself with your eyes closed. You have to imagine yourself driving that beautiful car. Also what you want to become and the type of life you want to live. See yourself with your dream car, your dream house and having the type of money you want. See yourself counting money in abundance.

4} Now add color to the scenes. Imagine yourself living the dream life you ever wanted. See yourself like on a television screen. Like you would watch a movie. This exercise alone could change your life.

5] Add emotions in your imaginations. This is the area many get it wrong when it comes to creative imagination. They don't add emotions, so they get no results from it. To have results you have to add emotions to your imaginations. Feel happy when you imagine yourself having those things in your mind. It is imaginations with emotions that bring results.

Advantages of creative imagination.

Creative imagination has some advantages. Like they always say, nothing is in vain when done properly. Below are some of the advantages of creative imaginations.

Unveiling your creative Power.

Creative imagination unveils our creative powers. Lack of creativity is due to the fact that many people don't give in to creative imagination. But if you want to become the next Bill Gates then you will have to use creative imaginations. It will unleash the creative powers hidden in you.

Revive brain Neurons.

Creative imagination can revive brain neurons. Inactive brain neurons affect your ability to productively do good work and make you lose focus. Neurons are information messengers. They use electrical impulses and chemical signals to transmit information between different areas of the brain, and between the brain and the rest of the nervous system.

Giving you clarity.

Creative imagination gives you clarity of purpose. Your mind is brightened and sees more clearly into the future. You are no longer confused in life but you know more exactly your purpose for living on this planet earth. This is what creative imagination can do for you.

Expansion of faith.

Creative imagination can expand your faith. When you start creative imagination, you will notice the reduction of fear in your life. You will start seeing the impossible. Faith will be expanded into every area of your life. Things you thought you could never possess now become things you know you can have or possess.

Unlocking your Mental Powers.

Mental power means mental strength. Some people are very weak in their minds. They have an inferiority complex vis a vis others. Because of this inferiority complex they lost opportunities that could have changed their lives. When you

practice creative imagination, you will be able to unlock the power in you and crush all opposition around you.

Genius.

Creative imagination can turn you into a genius. Some are born genius while others become genius. To become a genius, you have to practice creative imagination. Many dropped out school inventors like Thomas Edison are all born from the power of creative imagination. They became geniuses by practicing creative imagination. You too can start now and change the course of your life completely.

Ability to make good decisions. The reason for wrong decisions is due to just one thing: “the lack of proper creative imagination”. If you want to be on the safe side, taking good business decisions, marital decisions or any other decisions then practice creative imagination often.

Imagination has changed lives. Not only imaginations but creative imaginations. Practically use this weapon to rise above your foes and change completely the course of your life.

POSITIVE IMAGINATION.

Positive imagination has a great impact on the lives of people. With a positive imagination you are sure to bring all your dreams come true. Many rich people make use of Positive imagination.

Effects of positive imaginations.

Realization of dreams.

Positive imagination can help you accomplish your dreams faster. You will be able to realize your dreams at a rapid rate. Many find it difficult and have a delay in accomplishing their dreams because they are not applying the principles of positive imaginations.

Inner Happiness.

Inner happiness is very important for the accumulation of riches. One of the effects of positive imagination is that you receive inner happiness, and this inner happiness reflects in your lifestyle and those around you see the difference in your attitudes. Some people can even tell you are different because of the positive radiant emanating from your life.

Inner Joy.

Another good effect of positive imagination is that you receive inner joy abundantly. You know, you are on your way to destiny and that nothing can stop you. You are so confident and know you are a champion for life. This is what inner joy does for a person who has positive imaginations.

Favor before men.

The reason for continued rejection is because people don't have a positive mind. Their minds and thoughts are so negative that it repels those who can be a solution to their problems. But with positive imagination you have favor before men. Every man wants to be associated with you and help you accomplish your dreams.

Increased wisdom.

There are times we are hopeless in tough situations without a solution on how to overcome them. The reason is that the mind is negative and we don't possess the wisdom to address such situations. But with an increase in wisdom you will be able to solve these problems that come your way.

Slow Aging.

Positive imagination is a great way to slow aging. You always look younger and fresher. Worriedness is the reason most people get old faster. But lack of worry and positivity will keep you looking younger always.

Positive mindset.

Positive mindset means more solutions and one's ability to think right will open him more doors. Positive imagination enables you to have a positive mindset which is favorable to attract wealth and riches. Wealth and riches are answerable to those with a positive mindset.

NEGATIVE IMAGINATION.

The effects of negative imaginations.

Poverty.

The reason for poverty today is because of a negative mind towards money. If you believe rich people are all thieves, the truth is you will find it difficult to climb up the ladder and become like them. If you think money is just

for some certain people and not for you, money will flee from you. So a negative mind leads to poverty.

Sickness.

Scientists have discovered most illnesses are mental. Some sicknesses are results of a poor mental attitude. When you have a negative mind you attract negative and unpleasant circumstances in your life. Sickness being one of them that you attract.

Low self-esteem.

A negative mind leads to low self-esteem. Low self-esteem leads to a dull life. Low self-esteem makes a man to be unproductive and achieve lesser results. He offers little and ends up with little.

Sadness.

A negative mind leads to sadness. You see people who are always sad, Check their thoughts and their thinking pattern. The results of negative thinking are sadness. People who have no destination in life are bound to be sad because they don't know what the future holds.

Discouragement.

Negative mind leads to discouragements. There is no willingness to continue when one fails, this is because the mind has endorsed negative thoughts.

The man that thought his way into wealth.

Mr. Vincent Bakabe Baduma was a visionary. He was a man who believed in positive thinking and having a mind void of hate. He never bore grudges with any one and was always friendly with all those who came his way.

He was able to change things in his life in a very dramatic way. He used his thoughts to create wealth. He thought his way into financial prosperity. He was able to put his thoughts into action, and his thoughts guided him towards wealth.

He became one of the richest men to ever walk the face of the earth. He always believes man can have whatever he wants in life but this comes with a price. There must be a price to pay if you want to accumulate riches, he often said. Mr. Vincent the richest Oroko Man in his time used the power of thoughts to transform his life and became a wonder unto many.

MR VINCENT IDEOLOGY OF THE IMPORTANCE FOR IMAGINATION.

Positive influence. According to Mr. Vincent you have to practice imagination often because it enables you to have a positive influence around you. Your life becomes a blessing for those around you and they feel your warmth and presence and can be contaminated with your peace.

Creating good times. Positive imagination enables you to have a good time with yourself and your inner voice. Listening to your inner voice is the best way to develop your creative power, he often says. The best and good time you have is time you spend on imagination.

Forgetting Problems. According to Mr. Vincent, imagination helps you forget problems. We live in a world where we are constantly being bombarded with all kinds of unpleasant things. Problems seem to increase on a daily basis. The solution is positive imagination. It helps you forget problems.

Dance always. Mr. Vincent always says people must always learn to dance in the midst of problems. Imagination gives you the ability to dance and know there are better days ahead. According to him, dancing is the best way to relieve stress and to be fit to face challenges.

Smile Always. Mr. Vincent educated all those who came closer to him to always smile. Is by smiling that you unlock positive things coming your way. Sadness has never helped anyone. He believed smiling can bring good things in your life. Positive Imagination can lead to “frequent smiles.

**THE MAN WHO WANTS TO
ACCUMULATE WEALTH MUST USED HIS
IMAGINATION.**

6

**RENTAL PROPERTIES AND,
REAL ESTATES.**

OPPORTUNITIES ARE ALL AROUND US

MIND POWER OF WEALTH.

A man who really wants to accumulate riches must have rental properties. There are so many aspects of rental properties. Rental properties are not only buildings and lands. Rental properties could be chairs for rent, musical sets for rents and so forth. The mind power of wealth are rental properties. Most men who have accumulated riches have rental properties one way or the other. Mr. Vincent Bakabe had a lot of rental properties generating thousands of dollars.

What are the types of rental properties?

Below we will be talking about the different types of rental properties. You can choose any of them and start working towards having at least one of them. They are a great source of income especially when one is down or in times of crisis. Rental properties are also a great way to generate another financial opening in your life.

1} BUILDINGS. Buildings are one of the major sources of income. We are talking of rental buildings or buildings you give out for rent. I have seen many people who after retirement still benefit from their rental properties. There are 4 ways you can give out your building for rental space.

A} Students Hostels. You can give out your building for campus students, especially those closer to a university. During the school opening we always have a vast number of students scrambling for rental space. You can make your building an easy source of income by housing these students in your hostels.

B} Maternity Home. You can give out your rental building for a maternity home. Many areas lack these basic necessities and it's in high demand, especially

for nursing mothers and pregnant women. If you want to give out your property for rent, consider giving it out as a maternity home.

C} School. Many people scramble for rental space to start out schools. You can benefit from this and give out your rental property for schooling. So if you have been thinking about what to do about your rental space consider giving it out for schooling.

D} Guest Rooms. You can give out your rental space as a guest room or guest home. These people pay you a percentage of money you charge while they spend maybe a night or a day in your space. This is another great source of revenue when it comes to earning extra income.

2} HOTELS. Another rental property is a hotel. Many rich people understand this and build huge hotels that will give them a lifetime income. Hotel parlors are in high demand especially for ceremonial activities. If you have the budget and the capital, considering starting a hotel is not a bad idea but a lifetime benefit for you and your family.

3} Lands. Land can be used as a rental property. Some people offer their lands for others to build and take 6 months' rent or a year's rent. So if you have a piece of land than allow it to idle, it's better you give it out for rent and make profit from it.

4} COMMERCIAL SPACE. You can give out part of your property for a commercial space. Many people do this to generate extra income. You too can offer a part of your home for commercial purposes. It could be a restaurant, a glossary store and many others.

5} MUSICAL INSTRUMENTS. There are people who make a lot of money renting musical instruments. Start considering having them if you are thinking about another source of income. People need them for concerts, churches need them for crusades, others need them for anniversaries and birthdays. So musical instruments can be a great source of income if used as a rental property.

6} CHAIRS AND CANOPIES. Chairs and canopy are great rental properties that can really put money in your pocket. You can start with 50 chairs and increase them with time. Chairs are in high demand for ceremonial activities in most areas. Make use of this and build extra income for yourself and family.

Rental properties are really the mind power of wealth. This is not the thinking of an ordinary man but the thinking of the man who thinks creatively for ways to earn extra income without working or when he is on retirement.

FIGHTING DISCOURAGEMENT.

Everyone faces discouragement at one point in life. Others give in to the situation and back out from their projects while others give up due to some negative occurrences. But successful know that to attain higher heights and be influential they have to fight discouragement.

On this topic I will be giving you the ways rich men fight discouragement. There are many ways to fight discouragement but there are 10 ways which are top on the list of fighting discouragement.

10 EASY WAYS TO FIGHT AND OVERCOME DISCOURAGEMENT.

1} Be Combative.

You have to be combative if you want to win over discouragement. Discouragement is a force that will bring you down if you are not combative. You have to identify those factors causing you discouragement in your work and fight them wholeheartedly.

2} Looking Beyond the Problem.

For you to win over discouragement you have to look beyond your problems. Don't focus on the problem but try to see how bright the future is. Looking into the future and ignoring the problem is one of the best ways of fighting discouragement and overcoming them.

3} Practice the Coconut Tree Strength.

Coconut trees are very solid. They take time to grow but once they are up, you enjoy them for life. But this became possible because they overcame the storms and winds that they must face during growth. You too like the coconut tree, see the future and fight the storm. Knowing the future is bright will help you overcome discouragement.

4} Know it's Possible.

You have to know it's possible to achieve anything we aim for in life, if we put in the necessary effort for the accomplishments of such desires. It is this knowing that everything is possible that you will be able to fight and overcome discouragements. The word impossible should never exist in your vocabulary because everything is possible to him who believes.

5} Be Decisive.

Failure attracts people who are not decisive in their actions. It is attracted by people who waste time working on a project when all necessary tools are already at hand. So the best way to fight discouragement is by being decisive in actions. You have to decide to start the project no matter what happens, you just have to start on the said date you fixed to launch out.

6} Clean your Mind.

You have to clean your mind from doubts, hatred, jealousy, anger and selfishness. These things are contributing factors for discouragements. For you to effectively fight discouragement you have to clean your mind from these things and also from thoughts that pollute the mind of men and keep them in outer bondage of poverty and lack.

7} Talk less but listen More.

Too much talking may lead you into trouble. Talking too much may lead you to reveal your plans to others. Those who don't want your good will try their best to discourage you. But listening more will help you gather useful information that may help you progress. You could get an idea from someone that would change your life forever.

8} Have Hope.

A hopeless person cannot fight discouragements. They get easily defeated on their way to destiny. To fight discouragement, you need to have hope. Hope for

a more glorious future, hope for a prosperous life. Hope that you too will become a multi-millionaire by sticking to your dreams and goals of life.

9} Have a Soldier Mindset.

Soldiers are the pillars of a nation. Defend it against intruders and are ready to die for the nation. Just like a soldier you should be ready and willing to die for what you believe. Tell yourself this goal I am aiming at, must come to pass. Fight for its achievements. With this type of a soldier mindset you will discover all discouragements will vanish away.

10} Break the Bridges.

To overcome discouragement, you have to break all bridges behind you. Tell yourself you will not turn back no matter what happens until complete success. This is another solid way to fight discouragements and overcome them.

THE PRO AND CONS OF RENTAL PROPERTIES.

Rental properties have some pros and cons. I will be expanding on them on this topic. It is very important we know them because awareness is very necessary before embarking into a Project.

THE PRO OF RENTAL PROPERTIES.

Additional Income. One of the advantages of rental properties is that they give you additional income. You can be a banker, teacher, Pastor but having rental properties will serve as an additional source of income for you. This is what rental properties do for you. Having them is of a greater advantage.

Increase in one's finances. Some people cry of not having enough money to care for their needs and families. They complained of a shortage of money. But with rental properties one can experience an increase in his finances and live a comfortable life without bordering on a shortage in finance.

Financial Freedom. Financial freedom is the best thing that could happen to a man. Financial freedom means “not depending on other people to survive”. Rental properties give financial freedom. The ability to visit any country of your choice, take expensive vacations and give a good life to your family.

Financial Strength. Rental properties give financial strength. You are strengthened in all domains. You are able to do what others can't do. With this financial strength you are able to accomplish what others can't accomplish. If you need financial strength, then consider having rental properties.

Financial Empowerment. Rental properties can empower a man financially. Financial empowerment is very necessary in today's economy. You become more like a government, able to solve other people's problems when it comes to money. If you need to be empowered financially, rental properties are a very good option for you.

Financial Assurance. Rental properties give financial assurance. Not knowing where to get money when in need is a very big problem. But with rental properties you can have the money you want since your tenants pay you monthly rents.

Mastering and managing People. With rental properties you will be able to manage people. Your tenants whom you receive in your properties will be

of a great help to your management skills when it comes to knowing the mindset of people and how they behave.

Retirement Assurance. Rental properties offer retirement assurance. It gives retirement assurance for many people. knowing you will have a source of income when out of service is a great way to boost one's assurance. Many people today who are on retirement but having rental properties can attest to this.

Lifetime Income. Rental properties offer a lifetime income. You can live free and have money flowing day in and day out for life. There is nothing exciting as having a lifetime income. Money you know is coming frequently without interruptions. If you want a lifetime income, then rental properties are the surest way for you. Possess them in greater quantity and live free.

Family Inheritance. Rental properties are family inheritance. Rental properties move from generation to generation. This is the reason they are very important. You know, you have something in your hands that even when you are not your children will keep feeding from it from generations to generations.

Recurrent Income. Have you ever dreamt of having a recurrent monthly income in your life? If "yes" then considering having rental properties is not a bad idea at all. Instead it is a very good idea anybody could have. Start thinking of having rental properties for a lifetime recurrent income.

Managing Debts. Rental properties have helped a lot of people in managing debts. Whether it is debts with people, family or that of the banks. You can borrow an amount of money for a big project at hand and then start paying your debts little by little from the rents coming from your properties.

Family Allowances. For Some people, rental properties are a great way to solve family problems. Providing feeding money and pocket allowances for their children. Feeding their children and providing for their school needs.

Peace of Mind. Believe me, rental properties give peace of mind. Peace of mind knowing when and how to get money when you need it. Knowing you can eat food is peace of mind. Knowing you can take care of your family is peace of mind.

Though rental properties are of a greater advantage and are highly recommended, there are some cons or disadvantages of rental properties. We will see some of those disadvantages and give the provided solutions for them.

THE CONS OF RENTAL PROPERTIES.

Unstable Tenants. Some people are very unstable as tenants. They complain all the time about this and that. They are trouble makers and are very unfriendly. This type of tenants can be a headache to most landlords.

Solution. Before taking someone in your home as a tenant you must first know the person's background. Get all necessary information about the person. Ask him or her questions. Why do you leave your former place where you were renting? Asking these questions will help you understand him better as a landlord.

Maintenance. Maintenance is another problem faced by most landlords. Maintaining a building could be very challenging especially if your financial entries

are low compared to your family needs which are higher. This is the reason most rental buildings are dilapidating without any proper care.

Solution. Create a separate account for your housing maintenance. This money is not to be touched or used for any reason at all. It is to maintain your buildings in case of any eventualities.

Improper delegation as Inheritance. This is the area where most real estate's holders and landlords have it wrong. They give their inheritance to a wrong child who has no vision. This type of child always ends up selling the properties and squandering the money.

Solution. You should be able to delegate your rental properties to a responsible child. Don't give your inheritance or properties to a child who has no future. He has no vision and is chasing everything to become nothing. He left school and is on drugs, stays at home lazy and doing nothing. Identify your children and make the right choice.

Family Problems. Rental properties have caused some family problems. We have fights between children, arguing on who should have this or that share of the building. Who should collect rents here or who should manage this and that property. This type of fight is mostly common in polygamous homes with many wives and children.

Solution. Set the records straight on how your properties should be managed when you are long gone to avoid your children killing themselves over properties, instead of focusing on achieving their own.

Readiness of vultures to devour your work. Vultures are always ready to devour one's work. Who are vultures? Vultures are people or relatives who are ever ready to strip your wife and children from the inheritance you will leave behind. They are not ready to work but gather all their energy to steal someone's else's work.

Solution. Making all necessary documents to protect your inheritance is very important. Don't allow your properties for fate to decide on what happens next. Protect them with legal documents.

Eruption of War. We build and construct our homes and properties in safer zones. No one wants to build where there is war or in a war zone. Building takes a lot of money and time, depending on the structure you want to put up. But at times war can erupt in the areas where we have mostly invested. So what can I do in this type of situation?

Solutions. There are many possible solutions in a war zone where your properties are. Make your building a hospital or clinic to treat those affected in such areas. Many people flee from war zones making housing difficult but no one resists medical treatment if needed. It could be a source of income for you. Secondly you can sell those properties and use the money to invest in safer zones.

Real Estates and Rental Properties have almost the same pros and Cons. This is the reason I won't expand on it because both go hand in hand.

MR VINCENT BELIEFS ON RENTAL PROPERTIES.

Mr. Vincent believes rental properties and real estates are a great way to have money without stress. He believes so much in it that he constructed houses, bought lands in every part of the country. He had so many large hectares of cocoa farms producing tons of cocoa every year. His properties generated millions each year making him amassing more properties around the country.

Mr. Vincent believes one should not keep his money in the Bank. Use your money and build properties that will last. Keeping money in the bank serves no use because your money remains idle without any multiplication. But with rental properties your wealth increases considerably and you have full control of your money. Whereas money in the bank is controlled by others and you have nothing to say in case of any financial loss in the institution.

Mr. Vincent believes in rental properties and real estates and not the Banks. Banks will stripe you of your money, he often says. He often made this statement “if I had kept my money in the Bank today I would have had nothing”. He encouraged his children to invest in Rental Properties because that is a great way to gain financial freedom.

Mr. Vincent believes Banks only make the rich richer. According to him the poor save money in Banks while the rich borrow the money the poor save and invest them in mega projects and thus making them richer. This is the reason the poor get poorer and the rich get richer.

Mr. Vincent did not believe so much in borrowing money from people. According to him, borrowing money is a financial trap. When a man gets into it, it becomes difficult to come out. It's the worst form of way a man should indulge in.

For some people they can't stop borrowing. It is their lifestyle. The bible says "the borrower is servant to the lender.

Lastly Mr. Vincent thinks trusting people with your properties is the worst thing that can happen to a rich man. People are not to be trusted, even if that person is your best friend. All these ideas coupled with strong beliefs is what made Mr. Vincent one of the richest men in his time.

REAL ESTATES AND RENTAL

PROPERTIES ARE A WEAPON TO FIGHT POVERTY

7

ACTION.

MAN CAN ACHIEVE NOTHING,

WITHOUT ACTION.

Man cannot achieve anything without proper action. The reason for so much lack and poverty in the lives of people is inaction. They lack the will power to carry on that project that means a lot for their lives. Many geniuses with brilliant ideas are living very pitiful lives. Because they take no action in executing their plans.

All rich and successful people are busy people. They take action and execute their plans swiftly without any hesitations. If you want to become a multi-millionaire you have to understand, money respects only action people.

Inaction is the killer of dreams and responsible for an imbalance in financial life. No one succeeds without action. Man must understand action is one of the laws put in place by God. If you desire something, don't just sit down doing nothing. Take action on your plans. Have a goal, create a plan for its execution and take action immediately.

DIFFERENT TYPES OF ACTIONS AND WHAT THEY MEAN TO YOU.

The first 4 actions cannot accumulate wealth because they are weak and powerless. Whereas the last 4 actions on this list are needed for the accumulation of money, properties, wealth and riches.

CONSTANT ACTION.

Constant action is a very negative type of action. This type of action keeps one at the same spot. Constant action is doing the same thing over and over expecting different results. Constant action refers to that man who carries out a project but fails. Instead, to find a solution and try to analyze what caused the failure, he still goes ahead and does the same thing. He takes action but a constant one.

STAGNANT ACTION.

Stagnant action is worse than constant action. Stagnant action refers to a man who has a project and sits at home thinking the project will come and meet him in his bedroom. He is stagnant in his ways. He desires a job but sends someone else to do the interview for him. He takes some few steps but remains stagnant without any proper action.

REGULAR ACTION.

Regular action is a good type of action. Regular action refers to the man who carried a project and took actions regularly to ensure that the project came to its realization. He always attends all board meetings to ensure he is not left behind when it comes to management issues. Though it is a good type of action and merits credit, regular action is completely useless in the accumulation of money.

FREQUENT ACTION.

Frequent action is also another good type of action. This means it is an action carried out on a frequent basis. Though limited in the accumulation of money, it is necessary. Everything starts with a step and grows. Someone can be

frequent in action but doing a very wrong thing. Frequent action is not a guarantee for success but it's a good step to start from.

NOW THE LAST 4 ACTIONS NEEDED FOR THE ACCUMULATION OF MONEY.

TIME ACTION.

Time action refers to people who are always punctual in their work. They are first in board meetings and in other activities. They carry out their plans and projects on time. These are the types of people who accumulate riches. They always execute their plans swiftly and on time.

WALKING ACTION.

Walking can make a man accumulate wealth but in a very long period of time. He takes walking steps towards his goals and is wise and smart towards its accomplishment. He knows staying in a spot it's at his own detriment, so he takes walking actions. Walking action refers to a man who takes action but at times fails to write down some goals and work on them. He succeeds but in a very long time.

RUNNING ACTIONS.

It is better to run than to walk. Running action refers to the man who knows he has no time left. He is aware time is precious and need not to be wasted. He allows no distraction along his way. This type of man accomplishes much in his life. He succeeds much earlier than a walking man who takes an average action compared to him.

SPEED ACTIONS.

This is the man who thinks nothing else but how to make money. All his goals are written on a piece of paper and he executes them at the right time. Speedy action men don't waste time watching television. They are focused on their goals and plans in life.

Which type of actions do you identify yourself with? Change your actions and change your financial status and life in general.

THE HEARTBEAT OF SUCCESS.

Action is the heartbeat of success. Meaning without action there is absolutely no way anyone can obtain success. Where you see success, know that there have been some consistent steps and actions taken before success comes. People who accumulate riches understand this principle. They walk according to this principle and live according to this principle.

Before Mr. Vincent started his own Enterprise; he had to travel to Switzerland in order to increase his base of knowledge. He studied hard to acquire more skills and perfect his knowledge base. He was the first Cameroonian to study in such an institution and the Cameroon flag was hosted in the training center in Switzerland.

He understood that if he wants to succeed he will not just sit and wait for success to come. He understood men of action are the ones who own the wealth and riches on earth. He was the first black to ever have studied in such an

institution and the first Cameroonian to study there. This gained him maximum respect from his white colleagues.

After completing his training and getting his diploma, he was proposed to stay and work with a good company in Switzerland. But he refused and preferred instead to come back to his home country and put his experience and skills to work. Also he wanted to train others in his home country and make them more like himself.

He started “UNITED LOVERS ENTERPRISE” in Akwa Cameroon, which became one of the largest watch repairing enterprises in Cameroon at that time. Generating millions of Cash on a monthly basis. He established a good working system and harmony among his Employees and taught them the necessity to be united and work towards a common goal.

All these were possible because he took consistent actions towards the accumulations of wealth. He worked hard to offer the best education and life to his children. He was able to buy lands and properties. Constructed rental properties and had real estates. His work still shows today, generating Millions of cash on monthly, weekly and daily basis.

He understood that action is the heartbeat of success and that without action no one can achieve success. It is because of this way of taking consistent actions that made him one of the richest men to ever live and walk the face of this earth.

INACTION THE KILLER OF DREAMS.

Inaction is the killer of dreams. Many people we meet out there have dreams. But their inability to take actions kills those dreams. This should not be your case. Never allow inaction in your life and environment.

14 Ways to Overcome Inaction.

1} Charge yourself up every Morning.

You have to charge up yourself every morning. When you wake up in the morning, do not start the day by playing slow music. Put sounds that can really boost your energy up. You might not know but what you hear and do first thing in the morning determines how your day will look like.

2} See the bigger Picture.

You have to see the bigger picture in your projects. Most reasons for inactiveness is due to the fact that we don't want to start small. But if you start small and yet see a bigger picture of where you are going or want to become, you will have the necessary willpower to take action.

3} Avoid Inactive Activities.

Avoid activities that keep you at a spot and give you no vision for the future. Activities like partying, watching television all day long, going out with friends on a regular basis. Avoid activities that add no real values in your life. They are inactive.

4} Positive Confession.

Practice positive confession. Positive confession has an impact on your brain. They influence your subconscious mind and help direct your life in the area

of your confessions. You can practice creative positive confession by saying out loud what you want to achieve and become in life. Positive confession will help you overcome inaction.

5} Gather a team.

Gather a team or group of people with one objective. Working with a team makes you take action even when you don't want to. Just thinking you have people around you who look up to you as a model is a great way to overcome inaction in your life.

6} Don't listen to inaction People.

There are people around you that are very lazy and complete failures with their lives and you know them. They are inaction. Most of them are killers of dreams and their words can discourage you from taking action on a project that can make a real difference in your life.

7} Forget the Past.

Many people fail to take action because they dwell in the past. They are scared of starting over when they think about their past failures. They will be thinking of "what if". Avoid dwelling in the past because what is gone is gone and focus on the future. You cannot change the past and what happened is gone. Focus on the present and carry on that project and goal you have in mind. To overcome inaction, forget the past.

8} Be Mobile in your Goals.

Being mobile in your goals simply means have a plan B incase Plan A does not work. For instance, a man wants to raise capital for his business and he thinks “taking a loan from the Bank is the best option. Taking a loan from the Bank should be your plan A. Plan B could be selling a Piece of land or asking a Friend for help. If the bank tells you “no” you can simply apply plan B. Mobility in goals helps people to keep taking actions than to simply give up on the first trial. So be mobile in your goals, and always have a plan B.

9} Change strategy.

Change of strategy is a great way to overcome inactiveness. If you undertake a project or you are carrying out a goal but have continued failure, you have to change strategy. Don’t dwell on the same thing over and over. A change of strategy gives you a new momentum, and that momentum alone gives you the willpower to overcome inactiveness.

10} Think and do it.

Thinking about a goal is very important. But after thinking, take action immediately. When the time has ripe, take concrete actions. The problem with most people is that they think over a project or goal for too long and forget the main part which is action. So think and do it.

11} Visualize More.

Have you ever heard about visualizing the future? This is slightly different from imagination. Visualization is a great way to fight inaction. When you visualize, the subconscious mind directs your actions to that area of your thinking.

Start visualizing, because it fertilizes your subconscious mind on a daily and regular basis.

12} Have a Vision Board.

One of the ways to overcome inaction is to have a vision board. A vision board is a board where you write all your goals and what you want to achieve in a year, week or on a daily basis. A vision board is like your road map guiding you to your destination. Have a vision board, it is a great way to boost your confidence and helps you overcome inactiveness.

13} Have some Leisure with your family.

To have enough energy for work and for you to keep going, you need to have some time with family. Go out on vacation, take some new air and have some space only for you and family.

14} Master your craft and Work.

To overcome inactiveness, you must master your craft. The reason most people fail to take action on their work is because they don't master their craft and work. You have to perfect your skills and know exactly your strengths and limitations. Take the necessary courses to increase your work capability. Mastering your craft will help you to overcome inaction.

GO WHERE THE MONEY IS.

You have to go where the money is. Many undertake projects which are not beneficial and have no money value. For you to be free financially and become

financially independent you must undertake those projects that have money value or projects that can pull money into your life.

The reason for poverty is quite simple, you are doing what is not supposed to be done. You could be doing the right thing but at a completely wrong time. You could be doing the right thing but the thing has no money value. Poverty is attracted by this type of people. **So where exactly is money;**

Money is in people. You must never forget this fact. Money is in people. All the money you ever want in life is in people. How you relate with people will depend also on how they will help and assist you. Working together as a team in business can also help boost your finances. Treat people well because the money you need or ever wanted is in them.

Money is in ideas. Having money in a physical form starts with an idea. If you have an idea of starting out a project, go ahead and start the project because the money you need is in ideas. Money doesn't just come to you "NO", money is attracted by men of ideas.

Money is in a business. Starting a business is a great way to boost your income and make you self-reliant. You need to start a business because that is where money is.

MR VINCENT STRATEGY TO OVERCOME INACTION.

Be yourself.

According to MR Vincent to overcome inaction you have to be yourself in everything that you do. Don't try to do something because this or that person is doing the same thing and succeeding. Carry out your projects because you love what you do and not because someone is succeeding in some kind of business you don't love.

No remorse.

Man must have no remorse if he has to succeed in life. Remorse and hatred will make you ineffective in work and this may lead to inaction. Don't hate people and don't keep remorse when you are hurt by others. Learn to forgive others and forget no matter the misunderstandings.

Discipline.

You cannot achieve anything worthwhile without discipline. You have to discipline yourself at work. When you decide to take on a project you must discipline yourself to carry on that project. Lack of discipline leads to inaction in the lives of most people. This may result in a low financial performance.

Avoid Imitation.

Imitation is a sure way to failure. Imitating someone will lead to inaction. Let's say someone succeeds in a business and you too want to do the same business but fails, you will lose the vibes and momentum to start again. You may start thinking success is for certain people and not for everyone. But when you carry your own unique projects even when you fail, you still have the momentum

to keep going because you know no one else can do what you are doing. And that's what you are doing, only you have the solution.

Get Rid of Laziness.

To overcome inaction, you have to get rid of laziness. Laziness will keep you poor and no lazy man can ever be rich. Watching television from morning till evening is laziness. Reduce your play time and work more on those things that have a real financial benefit in your life.

**THERE IS NO SUCCESS WITHOUT
EFFECTIVE ACTION.**

8

MONEY CONTROL

THE ACCUMULATION OF MONEY, STARTS FROM THE MIND

The mind is a very powerful tool given by God to man. The mind of man is a place where all thoughts accumulate, whether negative or positive. Your thoughts from your mind makes your life. All riches start from the mind of man. All goals and accomplishments in life start from the mind. All thoughts and ideas start from the mind of man.

Man through his thoughts patterns have shaped the world we live in. All the technologies we see today started as an idea in the mind of man. The moving cars, fast trains, flying planes, our telephones and television sets all started as an idea in the mind.

All great musicians, inventors, scientists and those who accomplished much and have marked our world positively had an idea. They use these ideas to build something constructive. Your mind is powerful and is as deep as the ocean. There are no limits when it comes to mind power. Man can accomplish practically everything if he channels his thoughts to the right directions.

THE LAW OF ATTRACTION.

The law of attraction is a law that states that man becomes what he has attracted. Every good and evil thing that happens to you, positively or negatively you attract them. Your life today is as a result of your thoughts. You are fully responsible for your poverty or riches.

If you want to influence your life positively, change your negative thoughts into positive thoughts. Your life goes in the direction of your thoughts. If you are unhappy with your life and think of poverty all the time, the truth is you will attract those things into your life.

Below I will be expanding on negative thoughts and positive thoughts. Avoid the negative thoughts so as not to attract the negative into your life. But embrace the positive thoughts so as to attract good things into your life.

NEGATIVE THOUGHTS.

There are different types of negative thoughts that control one's life negatively. These thoughts are to be avoided if you want to live a happy life.

1} Thoughts of sickness.

Many people are sick today because they are attracted to it. Most illnesses are mind sicknesses. Meaning because of this negative thinking and fear of getting sick most people end up getting sick. If they change their thoughts, the illnesses they are afraid of will disappear.

2} Thoughts of Poverty.

The reason most people are poor is because they think about poverty all the time. They attract it into their lives. Worrying about not having enough money during the day is a sure way to attract poverty. What you worry about will be attracted to you. Change your thoughts and don't worry about money.

3} Thoughts of hatred.

The more you hate others, the more hatred is being directed to you from all directions. People will just start hating you for no reason. Help that should have come your way is being diverted to the man of love. Don't hate others, and try your best to free yourself from it. Get rid of hatred because it's a killer of joy.

4} Thoughts of Lack.

Thinking about lack will attract lack. Thinking thoughts like "I don't have money" will repel money away from you. Your thoughts are powerful and money responds to your thoughts. Money is attracted by those with favorable thoughts and not with people with the poverty mindset.

5} Thoughts of Fear.

Thinking fear attracts more fear. Fear is a very negative force that can keep one poor and broken. If you want to be rich and attract good things, avoid having thoughts of fear. Fear of disappointments, fear of failure, fear of losing a loved one. The more you fear, the more you attract those things that will cause more fear into your life.

6} Thoughts of wrath.

Wrath will only make a man poor, stranded and frustrated. You don't need such thoughts if you want to prosper and attract riches. No one should put you in such a situation, no matter what they do to you. Don't keep wrath, and don't keep malice.

7} Thoughts of Difficulty.

Thinking life is difficult will only make things more difficult for you. This is a negative thought and should not be accepted in your mind. Avoid people around you who always talk about the difficulty in life, country and how things are very hard.

POSITIVE THOUGHTS.

Positive thoughts have to guide the life of a man. When you think positively during the day, you attract positive things and positive circumstances into your life. You meet the right people and your steps are directed to the right places.

1} Thoughts of Abundance.

Start thinking thoughts of abundance to attract abundance into your life. You have to see yourself with the type of car you want to drive, the type of house you want to live in and the amount of money you want to possess. See the abundance and feel the abundance. The more you think of abundance, the more you attract it.

2} Thoughts of Peace and Prosperity.

You need to have thoughts of peace and prosperity. Always be confident that prosperity is yours. Be confident that you are prosperous. You may not have those things physically but remember that everything starts from the thoughts. Think of peace and prosperity.

3} Thoughts of love and Charity.

Thoughts of love and charity attract only good things in your life. Learn to be a blessing to others with your charitable deeds. Remember love is action, and love is demonstrated through giving. These actions stimulate your mind and make you more fruitful. And a fruitful mind can easily attract money.

4} Thoughts of Riches and Wealth.

Riches and wealth are only attracted to men of positive thoughts. Every great man that has accumulated wealth whether consciously or unconsciously did so by having a positive thought towards riches and wealth. They think about abundance until it becomes imprinted in their subconscious mind. Let thoughts of riches and wealth flood your mind during and along the day.

5} Thought of good Health.

Thoughts of good health will keep you healthy. Thinking thoughts of sickness will result in sickness. Never give in to sickness by endorsing it, but instead reject it with all your might and get rid of such thoughts. Confess frequently "I am strong and healthy". Your confessions have a positive impact on your mind and thoughts.

6} Thoughts of Success.

Thoughts of success will attract success into your life and goals. Never think it is impossible to achieve your dreams. Remember you attract what you focus your thoughts on. Start thinking thoughts of success. Success on all your activities, goals and plans.

7} Thoughts of Joy and Happiness.

You have to be joyful and happy. So embrace thoughts that make you happy. Watch fun programs that can make you laugh and smile. Think about things that will make you happy. If thoughts of death flash your mind, reject it and change thought immediately.

THE 4 TYPES OF WAYS MONEY IS BEING CONTROLLED.

A} MONEY IS CONTROLLED BY PEOPLE.

Money is controlled by people, that is you. Money is a great force and money has power. Money must always be in circulation for a country's economy to keep running. The only way money can be in circulation is by people using it for their day to day activities.

How you can have control over your Money.

You determine your expenses or how you spend the money. You choose what to buy at certain occasions without interference from anybody. Some use their money to care for their families while others spend it on drinks and squander with women.

You can decide to invest your money to produce more or to use it on a liability. Investing makes one richer and richer while spending on liabilities keeps one poorer and poorer. The rich know they have to invest while the poor lack this type of knowledge.

You have control over your money since you can decide whether to save it for interest or use it all on your pleasures. You have complete control over your money. You can decide to start a business or use it for outings and vacations that have no financial benefits.

B} MONEY IS CONTROLLED BY THE GOVERNMENT.

Money is controlled by the government. Governments of countries have in place strategies on how to control the money their citizens possess. Governments are to be viewed like a person who has its own needs and every government needs money to survive.

How the government controls the money of its citizens.

Governments control money through taxes. They ensure every citizen of a country gives tax. Whether production tax or consumer tax. This money helps the government to cater for the needs of its citizens in times of challenges like offering housing to the homeless, building schools and hospitals.

Production tax is a tax the government imposes on big companies that produce their own products. Companies like brewery companies, sugar companies and many others. While consumer tax is a tax the government imposes on goods bought either from the market or at shopping malls.

There are many other ways the government controls our money but I just wrote about the most important which is taxes.

C} MONEY IS CONTROLLED BY THE BANKS.

Another way money is being controlled is by the banks. Banks are institutions put in place either by the government or individuals for a better running of an economy. They serve as a means to regulate money and to ensure its proper distribution.

How Banks Control Your Money.

Banks use the money you deposit and borrow for interest. In other words you save money and banks take your money and lend it to the rich. The rich use your money and build rental properties, Super Markets and construct many other mega investments.

Banks also ensure there is a recycling of money. Meaning old bank notes being replaced by new Bank notes. They also assist in the management of inflation and deflation for a better functioning of money in the society.

THE POWER OF INVESTMENTS.

Money invested has power and can really transform the life of a man. There are 3 different types of investments.

Investing in Bonds. Bonds are certificates that promise to pay a fixed rate of interest. A person who buys a bond is not buying ownership in a company but is

lending the company money. Bonds generally pay more money than preferred stocks do, and they are usually considered a safer investment.

Investing in Stocks. A stock is also known as a security that represents the ownership of a fraction of a corporation. This entitles the owner of the stock to a proportion of the corporations' assets and profits equal to how much stock they own. Units of stock are called "SHARES".

Investing in a Business. Starting a business is the best thing that can happen to you. Business is a sure way to become your own boss. Money invested in business grows with time. With the right business and the right mindset, you are sure to be profitable in less than 5 years.

The negative influence of Money.

Money has negative influences upon the lives of so many people. One of the primary negative influences of money is bribery and corruption. People in governments, in high offices indulge themselves in such practices. For a country's economy to be prosperous, governments should fight bribery and corruption. People should have what they deserve at work and have worked to achieve in life.

There are many other negative influences of money like stealing, prostitution, thievery, Murder and others. Money should never control you but you must learn to be master over money and control it. Don't be carried by the negative influences of money.

The Positive Influence of Money.

Money has a lot of positive influences but the primary positive influence of money is that money can make a man look important. Those with money attract more favors and they command respect. When you have more money, the more you will find yourself solving problems. Money increases your self-esteem and makes you look good at all times.

Now let's see the 3 types of people in society and how they spend their money.

How the Rich Spend their Money.

The rich spend their money on assets. The reason why they are rich is because they understand assets put money in their pockets. Assets are rental properties, real estates, businesses, investments. The rich tries by all possible means to avoid spending his money on things that take money away from his pocket.

How the Middle-Class Spend Their Money.

Middle class people spend their money on liabilities but they think it's an investment. Middle-class people are Civil servants, Doctors, Lawyers. They buy cars, expensive electronic appliances, expensive gadgets and many other liabilities. Anything that depreciates in value is a Liability and it takes money away from you. This is the reason most middle-class people struggled financially.

How the Poor Spend their Money.

Poor people spend their money only on expenses. They only buy things and also spend their money recklessly. They spend money on liabilities thinking they

are assets. They don't understand the reason they are poor is because of this careless habit of spending money. If you keep spending all your money without keeping and saving some, how will you be rich?

The middle-class and the poor must do like the rich, if they want to accumulate riches. They must copy the habits of the rich if they want to become millionaires. They must start acquiring assets and do investments so as to be free from the lack of money.

MONEY CONSCIOUSNESS.

Money consciousness is a very powerful weapon to fight against poverty. You have to be conscious of the circulation of money around you. Many people are not money conscious but they are poverty conscious.

The reason most people are poor is due to the fact that they focus their thoughts on what they don't have instead of focusing on what they want to achieve or the amount of money they want to accumulate. Focusing on poverty and being worried about money all the time will only bring more lack of money in your life.

The best way to be money conscious is to write down your goals on a piece of paper. The amount of money you want to accumulate in a week, month or year. Set a higher target and lay out a plan for its accumulation. Take action on your plan immediately.

The difference between the rich and the poor is that rich people think about creative ways to make money while poor people worry about money all the time.

The more the rich think “how can I make this money; the more money is attracted to them. So change your thinking pattern about money. Be positive and believe you too can accumulate the amount of money that will make you a millionaire.

Never underestimate the power of positive thinking when it comes to having a money consciousness mindset. Fear and doubt can make a man lose focus and start thinking worried thoughts. Develop a money conscious mind and you will be amazed at the results.

MINE YOUR MONEY.

Mine your money is another metaphor of saying “mind your business”. Meaning do what you like with your money without worrying what people think. What you do with your money is solely your responsibility. Caseless of what others say or think. It is your money and you have the right to use it the way you like. So “Mine your Money”.

There are 8 ways you can “Mine your Money.

Use your money Productively.

You have to avoid programs that waste your money. Avoid things like gambling, paid video games. These things have no reproductive value and are a waste of money and resources. Instead use your money on things that have real productive values like attending a course on financial stability or buy a book on productivity.

Use your Money Objectively.

Using your money objectively simply means using your money with objectives. When spending your money, you must first think “why do you need this or that thing? You must spend your money with an objective.

Avoid Lending Money.

Most people spend their lives thinking about who they can borrow money from. This type of people always borrows but never refunds what they borrow. Even if they refund, at times it's money borrowed from another person. Better help people out than borrowing them. If you don't have just say “No”

Don't give your Money to Lazy People.

Avoid giving your money to lazy people. Lazy people are always begging, and they are not working on any project. They watch television from morning till night. They are visionless and have no goals. Giving lazy people money won't help them but it will make them become lazier.

Avoid borrowing Money.

Avoid borrowing money at all costs from people. When you borrow money from others you lose your power and respect and you become dependent and you can be easily manipulated. You become a servant and a subject. Think creative ways on how to make money so as to avoid unnecessary debts.

Protect Your Money.

Protecting your money is a must if you want to become wealthy and a Millionaire. When I talk of protecting your money I don't only refer to protecting from thieves and fraudsters. But those around you also, couple with friends and

family. It is really dangerous to make people know you have money. They will devise ways to take the money from you even if it means lying.

Let your Money Work for You.

Let your money work for you and not the other way round. Making your money work for you simply means starting a business and employing people. when you have a business that is working without your presence and generating income, it means your money is working for you. So start a business or any other project that does not require your presence but can generate more money for you.

Direct your Money to the Right Channels.

Directing your money to the right channels is an obligation for everyone who desires to be rich. If you direct your money to wrong channels like cigarettes, alcoholic drinks, cocaine, clubbing, be sure to meet with mediocrity and poverty. You must direct your money to investments and on things that are productive and can really make a difference in your finances and career.

START A BUSINESS.

Starting a business is the best thing that can happen to a man. Starting a Business is a great way to boost your income and become financially stable. You have to consider starting a business if you want to become a millionaire. Most millionaires are business owners working for their own account.

If you are considering starting a business make sure you seek business advice regularly. Most people fail in business because they don't seek advice. Ask those who have succeeded in the type of business you want to do on "how they did it" what are their strategies and techniques? This will help you avoid unnecessary failures and setbacks.

Having your own business makes you dependent and this dependence gives you more wisdom on how to manage not only a business but your own life too in every aspect. Most people are financially down because they love to work for people. The more you work for someone, the more they become richer. Become your own boss by starting your own business.

Starting a business gives you profit. It could be daily profit, monthly or yearly profit. You will be able to manage entries, work closer with your customers and manage your workers well. Profits are a very essential part in every business and they determine the growth of your business.

Starting a business gives you financial balance. Financial imbalance is the cause for many problems in society today. Things like depression result from financial imbalance. Financial imbalance can also cause couple problems and real marital issues. But with a business you will be able to have financial balance and become financially independent. So you have to start a business.

GIVE TO CHARITY.

This is the main reason for human existence. Give and it shall be giving unto you. Give a portion of your income to charity. Help the needy and feed the poor.

When you have an amount of money as profit each month, remove a percentage from it for good works. It must not necessarily be something very big. Remember a tiny seed brings forth an Iroko Tree. When you see a huge tree around you, know that it grew from a tiny seed.

Giving is a very important component of happiness. Many people live sad lives. This is because they have not generated the passion to help others. When you truly help someone becoming something or having something, their joy becomes your joy and you will truly be happy.

The Five Laws of Giving.

1} The Law of Sowing and Reaping.

This law stipulates that whatsoever a man sow, he shall also reap. If you sow problems, you will reap problems. If you sow disputes you will reap disputes. If you give to charity you will reap what you give. If you sow corn you will reap corn. If you sow pear seed, you will reap pears. This law applies to everybody who lives on this planet earth.

2} The Law of Returns.

This law states that what you give out will return back to you. If for instance you smile at someone, chances are he will smile back at you. If you slap someone chances are he might want to slap you back. If he doesn't do it immediately, he might do it in another form. Giving to others will bring good things in your life and a huge positive return.

3} The Law of Cause and Effect.

This law states that in every cause there is an effect. Meaning that in every action you take there are consequences. This could be good or bad actions. Giving out to charity and those in need is a good action. You will surely have a positive effect because in every cause there is an effect.

4} The Law of Circulation.

The law of circulation is obtained from the way water flows. Water flows in circulation. The Bible says cast your bread upon the waters and in due season you shall receive it. Meaning when you give to charity you are casting bread on the waters. Sooner or later what you have cast upon the waters will come back to you in multiple folds. Remember what circulates brings freshness, newness but what is stagnant is dirty and unclean.

5} The Law of Giving and Receiving.

Giving is a law and receiving is a law. The man who does not give will not receive anything. Do unto others what you want them to do unto you” If you are stingy no one will help you or give anything when you will be in need. Do you want good from others? then learn to do good to people.

PAY YOUR TITHES.

I did not say give your tithes, but pay your tithes. There is a big difference between paying your tithes and giving your tithes. Giving tithes simply means it's a choice but paying tithes is an obligation. Every child of God has a moral responsibility to pay their tithes to God. 10% of your income has to go for the support of religious activities in the church where you worship.

I heard of billionaires who don't visit any church but send their tithes regularly to churches to support God's work. Though they don't attend church, they understand the power of tithing and the positive impact it can have on their finances.

IMPORTANCE OF PAYING YOUR TITHES.

Tithing opens you more financial doors.

Rich people are excited when it comes to tithing because they understand the power of tithing and the financial benefits it brings. Most Poor people always complain about tithing, and they don't understand it may be the reason why they are broke and poor. Tithing has great financial benefits.

Tithing has health benefits.

If you have a challenge in your health, then tithing could be the solution for you. The bible says I will rebuke the devourer if you are faithful in your tithes. God is able to heal you if you are faithful in tithing and also to keep you secure from the hands of the enemy.

Tithing extends God's Protection.

God protects the tither. He that is faithful in tithing will have the protection of God and his household will be secure. When the evil day comes a miraculous solution will show up. Tithing is really a blessing to every one of us. It's a sure path for God's protection.

THE POWER OF WORDS.

Words are the foundation of accomplishing.

HOW WORDS CONTROL THE MIND.

Words control your mind and your mind controls your life. Your day to day activities are influenced by your thoughts which are influenced by your words. Words are powerful and live changing or life destructive. You must control the words that come out from your mouth.

Words control your mind and at the same time control your actions. The actions you take today whether negatively or positively started from your words. That's how powerful words are. If you are poor in actions and easily give up, you must check the type of words you are using on a daily basis.

Your words influence your work. Lack of motivation in work is a result of negative words. Negative Words like "it's difficult" will greatly affect your work and activities. If you want to be self-motivated, then you have to control your words. Positive words have the tendency to keep you motivated.

Words influence your thinking pattern and your thinking pattern directs your life. Look at your life today, is it the life you have been dreaming to have or is it a life which is not what you had desired? Answering this question will help you understand the type of words you are using for or against yourself.

Words give you a positive or negative perception of things. Have you ever met people who are very negative? No matter the proof and facts of what you present to them, they will still argue and tell you it's not so. This type of person has a negative perception of things. Their minds have been programmed to think that way by the type of words they are using or have been using.

Words affect your mind, which in turn influences your behavior and actions. Most causes of poor behavior are because of words that have influenced the mind of the person. You need to shape your thoughts positively by using and uttering the right words. Always be positive and you will see the financial benefit of it.

WORDS ARE SPIRITS.

Words are spirits indeed and they have a transformative power. God created this world through words. He used words to say let there be light and there was light. That's how powerful words are. Every one of us created in his image has this same power in our words, either to build or to destroy.

Words can create your life.

You can use your words and change things positively around you and in your environment. Let others use their words to hurt people, not you. Use your words constructively by speaking good about your life and future. Speak positively into your future and by doing so you will activate the power to become that which you were destined to be.

Words are as Powerful as the person himself.

When someone speaks we identify him as his words. His word and him are one. A man cannot be separated from his words. A man cannot be judged outside his words because they are one. That's why you have to be careful with the type of words you throw at others. If you can't speak well in someone's life, then stay quiet.

Words can destroy a man.

When you go for an interview, you are asked some questions and the way and answer you give is a determinant factor if you will be accepted for the job or not. That's how powerful your words are. All the negative words you use during the day help shape your life. Your life today is as a result of your words. Many people are rejected, poor and stranded today because of the words they have used or are still using. Change your words and change your life.

Words can open many doors of opportunities.

The world of opportunity is open for the man with positive words. People respond positively with those who know how to use their words correctly to create a solution. People respond well to polite words and open their arms wide to help such a person in time of need. Talk to others in a friendly way and unleash your doors of opportunities.

WALLS AND BIRDS CAN HEAR WORDS.

According to the Bible, birds can carry the song of your words in the ears of someone. The bible says do not speak against the king if not the birds of the air

could take your words to the king. This is how powerful words are. They have the power to remain even when we are long gone.

When you criticize someone in your bedroom, let's say you speak about a friend or co-neighbor you are living in the same place with, the walls can keep your words until that person returns and through his 6th sense perceives something is wrong. Have you ever entered a room and felt those there were surely discussing you? Most of the time you were correct because the energy they release in the room against you sends a message in your subconscious mind once you enter. This is the reason speaking against people in their backs is very dangerous.

Now what if the person does not stay with me? Here the second scenario comes into play, which is the birds in the air can take your words to them. Stop backlashing others. If you can't speak well about someone then just stay quiet. When a friend brings a negative discussion about someone just say "excuse me" then walk out. It is for your good. Remember if someone speaks negatively about people to you, she will speak negatively about you too to others.

WORDS ARE NEVER FORGOTTEN.

There are 4 types of Words People always remember.

Below we will be seeing the 4 types of words people always remember. This is to illustrate once again the power of our words.

Hurtful Words.

People never forget hurtful words. Provocative words are very dangerous because they keep us thinking over them again and again. That is the reason you must be careful with the type of words you throw at people. Always think well before you respond to someone. There are people who have said some things to you that even today when you think of it you become very angry. We don't forget hurtful words even if we forgive people for using them on us.

Good Words.

People don't forget good words. They always remember words spoken to them in good times. Like their first baptism or words spoken on their wedding day. This is the reason you should treat people nicely and speak to them nicely because in due course they will remember you. In time of their troubles they will remember you and your words may be a comfort to them in days of their challenges.

Word from a Lover.

Most of us have had lovers in the past, those we truly want to spend our lives with but things didn't work out well because everyone had his own values and separation was inevitable. Their words are still with us, we don't forget them because those words were spoken from deep seated emotions. At times we remember them and smile.

Words spoken by A relative who is no More.

Our brothers and sisters who have gone beyond we still remember their words when they were with us. Their words are like anchors in our mind. There are some people who even go as far as sharing tears when they remember their

words and actions. Words are powerful, so be careful how you use them. They are never forgotten and stay with us forever.

SILENCE THE MOST POWERFUL WEAPON.

Silence is a powerful weapon many are ignorant of. Many people think if they have a conflict with someone they have to respond to the person to show their strength. But at times the more you respond, the more the conflicts intensify.

When you are silent, you become unpredictable to your enemies. They don't know what could be your next move. Beware of an unpredictable man, the world is under his feet. No one dares a man, they don't know his reaction when it comes to provoking him. Become unpredictable in front of your enemies.

When you are silent, your plans and goals and your next moves are hidden. People who talk too much always reveal their plans and goals and this makes others use it against them. You have to be silent in the midst of friends. Let them talk and reveal their plans, you may gather important information that will help you foster your plans and goals.

At times keeping silent in the midst of trouble maker's hurts. Have you ever seen people in conflict or maybe you have been in one yourself where you will hear someone say "Are you not saying anything"? The problem is, the guy is hurt by the silence of his opponent and he needs his reaction so he can continue the argument.

Silence makes you avoid conflicts. Many conflicts today could have been avoided if everyone knew the power of silence and used it as a weapon. Learn to

use silence as a means to solve conflicts. This principle mostly applies for married couples too. If a partner keeps quiet when the other is raising the voice, the quarrel will dissipate. Remember answering people back is not always the best way to solve a problem.

Silence makes you look wiser even if you are a foolish person. This is because we only recognize a fool by his words. But when you are silent people consider you as a wise person. This is a big win for you and an outstanding human behavior.

**OUR WORDS CAN EITHER BUILD,
OR DESTROY.**

10

HAPPINESS.

Happiness is the component of a
bright life.

Everyone you meet on the streets or in your neighborhood wants a happy life. Everybody wants to live a happy life. You will hear some people say if I have this or that thing I will be happy. If I pay my rent, if I buy a car, if I have 10 million bucks then I will really be happy. Everybody craves happiness and desires it at all costs.

The truth is, happiness is a choice and not a feeling. Happiness does not depend on what happens to you. You can choose to be happy in the midst of troubles and problems. This is so because happiness is a choice. We choose to be happy or sad. Don't allow situations beyond your control to keep you sad but stay motivated and always be happy.

To be happy depends solely on you and the way you react to what happens to you. Turn every situation in your life into happiness. Everything happens for a reason and it's for your good. Take a look at yourself in a mirror and laugh your way out of every situation that wants to keep you down.

SMILES ARE CONTAGIOUS.

Have you ever noticed when you smile at someone he smiles back at you? If you have noticed it then try it. Smiles are very contagious and produce a return effect. When you smile at people in a 99% case they will smile back at you. That is how powerful smiles are.

Smiles portray a sign of politeness and openness towards others. It makes others comfortable when they are in your presence. Never make others uncomfortable when they are with you. They may start to avoid you and people avoiding you will make you more and more isolated. This will make you lose opportunities.

Never minimize the power of smiles and never neglect its effects. It is a force to reckon with and to take full advantage of that force. Smiles are contagious and are a good way to develop a perfect relationship with others.

LAUGHING THE SECRET OF JOY.

The most boring set of people are those who never laugh. Who always carries a sad face and a very uncomfortable countenance. Have you ever met people like that? Problems should not determine how happy you should be. We said earlier that we should be happy no matter what and that happiness is by choice. People chose whether they should be happy or sad.

The best way to demonstrate happiness is by laughter. You have to understand something must not happen for you to laugh. Look at yourself in the mirror and laugh. The more you do that, the more you develop a constant flow of

joy in your inner man. Put on a fun series or movie and laugh your lungs out. Practice laughing frequently and you will be amazed how fresh and young you will become day by day.

INNER HAPPINESS.

Most successful people have inner happiness. Inner happiness can be obtained through visualization and imaginations. We earlier discussed that in chapter 5 on imaginations. The best way to develop inner happiness as we say is through imagination. Sit down in a quiet spot and see yourself with the things you want. See yourself with the spouse of your dreams, car of your dreams, house of your dreams.

HOW TO BE HAPPY EVERYDAY.

It is very possible to be happy every day. Many don't know that, so they think there are days one can be happy and then days one can be sad. The truth is, you can be happy 24hrs a day. Below I will be presenting to you some key points on how to be happy every day.

1} Ignore Problems which are persistent.

There are situations that can never change no matter how hard you try to change them. There are problems that will persist no matter how hard you try to find a solution. The best thing to do is to ignore them. Focusing on a problem is only to make it worse, so Ignore it and look into the future.

2} Think of Success.

Even in the midst of failures, you have to think about success. Think of success in everything that you do and kill the thoughts of failures. Knowing you have a brighter future with a lot of promising projects is enough reason to keep you happy. Think success thoughts throughout the day and don't allow thoughts of failure to hold you down.

3} Develop a positive Mental Attitude.

You have to develop a positive mental attitude during the day. Meaning thoughts of negativity should not be allowed in your thinking. Your thinking throughout the day has to be positive. Read books that can help to boost your mental attitude positively and avoid negative news that pollutes the mind.

4} Love others.

The reason most people are not happy during the day and the course of their lives is because of hatred and revenge. Hatred and revenge only hurts your feelings and keeps you bound at the mercy of mediocrity. You have to love others; this event has to be at the forefront of the list of "how to be happy everyday" because love is the channel from which all happiness flows.

5} Be Grateful.

If you want to be happy every day you have to be grateful. Be grateful for the things you already possess. The more you are grateful to God, the more he will open more doors of opportunities for you. The more you are grateful to God, the

more he will bring good things in your life. Things that will enable you to be more grateful.

6} Forgive Others.

The most difficult part of human existence resides in forgiving others. We are glad when people give us and bless us but so difficult to forgive them when they wrong us. We can easily forget the good others have done to us at the detriment of the wrong they did to us. Learn to forgive and turn the page, this is where real happiness is found, in forgiving others.

7) Do what you love.

If you truly want to be happy then you have to do what you love. The reason many are not happy with their lives is because they do what they don't like. You don't love teaching, then don't do it. Do what you like even if you are starting small. But the most important thing is to be happy. So true happiness is found in doing what we love. Do you love your current job? If not, then quit if not you will not be happy.

8} Be busy with your goals and aspirations.

Lazy people can never be happy. They are stranded all day long and thinking what type of life is this? They watch television from morning till night. But to be happy you have to be busy with your goals during the day. Work your visions and goals and give your best and all.

9} Give to others.

Another sure way to daily happiness is to give a portion of your bread to others. Be a blessing to others and make them happy. When you make others happy, you too will be happy. Thus goes the saying “do unto others what you will want them to do unto you” never miss an opportunity to give bread to someone in need.

Mr. Vincent Thoughts on happiness and the reason why you should always be happy.

Mr. Vincent Bakabe Baduma was a happy man. He demonstrated his happiness through his works. He always tells me that no one is happy like him on earth. Despite his possessions he always acknowledges that life is nothing and that one day one will depart and leave all behind. He was always conscious of eternity and he believed in God.

According to him, for you to draw abundance into your life, you have to be happy and grateful. He believed that to be rich and successful, happiness must be included in the ingredient. He believed in positive energy and that this positive energy brings good things in our lives.

According to him, no matter what evil people do to you, don't react but analyze it because nothing happens by chance. There should be a reason for it. Even when he was slapped in school by a fellow student he refused to react though he could overpower the guy. He believed if it happens God must have a reason for that. You too learn to forgive others and be willing to love without condition.

Always be happy it is the mark of all successful people. Don't allow setbacks, disappointments and problems to take happiness in your heart because your happiness is golden. Be Happy always.

HAPPINESS IS A CHOICE

CONCLUSION:

To be rich and wealthy you must understand that there are principles for it. Learning these principles and mastering them is a sure way to financial prosperity. Man was created so he can have whatsoever he wants on earth. Man was not created to suffer because God has put everything here on earth for man's consumption.

Money is always available and it takes a man of wisdom and financial knowledge to gather it. Also taking action on your goals is a sure way to wealth. You must learn to take action immediately on ideas that pop up from your mind. Action is the mark of all successful people.
